CR-482 Keyboard Shortcuts - Owner Smoke Test

Generated 06 Nov 2026 | Phases P0 - P17 | Shortcuts ON unless noted

Prerequisites

How to enable shortcuts:
1. Login to POS > Settings > Status Configuration > UI Elements
2. Toggle "Keyboard Shortcuts" ON > Save
(Or: browser console > localStorage.setItem("mygenie_keyboard_shortcuts_enabled", "true") > refresh)

Mac users: Hold fn + F-key for all function key shortcuts (F2, F4, F7, F8, F9).

Test outlets: cafe103 (427 items, customizable items, no weight items)
Kashi Sweets (weight items: Gopal Bhog, Ghee Patisha)

Rule: Shortcuts OFF = zero change to current behaviour. Every test has an OFF check.

P0 | Key: None | Foundation + Toggle (no visible shortcut)

☐	**0.1.**	Go to Settings > Status Config > UI Elements. Find "Keyboard Shortcuts" toggle between Weight Entry Prompt and Auto-expand Served Items.	*Toggle is visible and saves correctly.*
☐	**0.2.**	Toggle OFF. Open any table.	*No auto-focus on search. No orange rings anywhere. Behaves exactly like before.*
☐	**0.3.**	Toggle ON. Open any table.	*Cursor blinks in the search box automatically (P1 test).*

P1 | Key: None (auto) | Search auto-focus + Tab trap

☐	**1.1.**	Shortcuts ON. Click any table to open order screen.	*Cursor is blinking in the item search box without clicking.*
☐	**1.2.**	Open a walk-in order (Add button).	*Same: cursor in search automatically.*
☐	**1.3.**	Press Tab repeatedly until you reach the last element.	*Tab wraps back to the first element inside the order screen. Does NOT jump to dashboard behind.*
☐	**1.4.**	Shortcuts OFF. Open any table.	*No auto-focus. You must tap/click the search box manually.*

P2 | Key: Type letters/digits | Orange ring on matching item

☐	**2.1.**	Shortcuts ON. Type an item code (e.g. "1").	*Item with code exactly "1" gets an orange ring, even if "10" or "101" appear first.*
☐	**2.2.**	Type a name fragment (e.g. "amer").	*First matching item (Americano) has the orange ring.*
☐	**2.3.**	Clear the search box.	*Ring moves to the first item in the grid.*

P3 | Key: Arrow keys | Move ring around item grid

☐	**3.1.**	With items visible, press Down arrow.	*Orange ring moves to the item below.*
☐	**3.2.**	Press Right arrow.	*Ring moves to the next item on the right.*
☐	**3.3.**	Press Up and Left to navigate back.	*Ring moves accordingly. At grid edges: stays, no crash.*
☐	**3.4.**	On a long menu, arrow down past the visible area.	*Grid scrolls to keep the ringed item visible.*
☐	**3.5.**	Mouse click on any item.	*Still adds to cart normally (unchanged).*

P4 | Key: Enter | Add ringed item to cart

☐	**4.1.**	Type an item name, see the orange ring on it. Press Enter.	*Item added to cart (qty 1). Search clears. Cursor stays in search.*
☐	**4.2.**	Press Enter again (same item).	*Qty goes to 2 (merge).*
☐	**4.3.**	Search for something with no results. Press Enter.	*Nothing happens. No error.*
☐	**4.4.**	Shortcuts OFF. Press Enter in search.	*Nothing happens (no item added).*

P5 | Key: Enter / Ctrl+Enter / Esc | Customization popup keyboard

☐	**5.1.**	Search for a customizable item (e.g. "Allfredo Pasta"). Press Enter.	*Customization popup opens. Cursor moves into the popup.*
☐	**5.2.**	Use Tab to reach variant options. Press Enter/Space to select a variant.	*Variant selected (same as clicking it).*
☐	**5.3.**	Press Ctrl+Enter.	*Item added to cart with selected variant. Popup closes. Cursor back in search.*

☐	**5.4.**	Reopen the popup. Press Esc.	*Popup closes. Nothing added. Cursor back in search.*
☐	**5.5.**	With popup open, press + or type in search.	*Nothing happens outside the popup. Shortcuts are paused while popup is open.*
☐	**5.6.**	Required variant not selected. Press Ctrl+Enter.	*Same validation as clicking the button (toast/error shown, not added).*

P6 | Key: Enter / Esc in weight popup | Weight item keyboard

☐	**6.1.**	Search for a weight item (e.g. "Gopal Bhog" on Kashi Sweets). Press Enter.	*Weight popup opens. Cursor in weight box. Value "1000" is highlighted/selected.*
☐	**6.2.**	Type "500" and press Enter.	*Line added: 500 gm at correct price (not 1000500). Search cleared, cursor in search.*
☐	**6.3.**	Reopen. Press Esc.	*Popup closes. Nothing added. Cursor back in search.*
☐	**6.4.**	Leave weight box empty or type 0. Press Enter.	*Error shown: "Enter a valid weight". Popup stays open.*
☐	**6.5.**	Mouse: click weight item, select 250gm pill, click Add.	*Still works normally (unchanged). 250gm line added.*
☐	**6.6.**	Shortcuts OFF. Click weight item. Type in the weight box.	*Weight box text is selected on focus (typing replaces, not appends). Works for everyone.*

P7 | Key: Enter / Esc in price popup | Dynamic price item (Rs.1 items)

☐	**7.1.**	Search for a Rs.1 priced item (e.g. "test1"). Press Enter.	*Price popup opens. Cursor in price field.*
☐	**7.2.**	Type "120". Press Enter.	*Item added at Rs.120. Popup closes. Cursor in search.*
☐	**7.3.**	Reopen. Press Esc.	*Closes. Nothing added.*
☐	**7.4.**	Leave empty or type 0. Press Enter.	*"Please enter a valid price greater than 0" error. Popup stays.*

P8 | Key: + / - keys | Change quantity of last added item

☐	**8.1.**	Add an item (e.g. Americano). Press + twice.	*Qty goes to 3.*
☐	**8.2.**	Press - once.	*Qty goes to 2.*
☐	**8.3.**	Press - repeatedly.	*Stops at 1. Never removes the item.*
☐	**8.4.**	Numpad + and numpad - also work.	*Same behaviour as regular +/-.*
☐	**8.5.**	Type "ab" in search. Then press -.	*"ab-" typed in search. Qty unchanged (correct: +/- only work from empty search).*
☐	**8.6.**	Add a second item. Press +.	*Second (most recent) item qty changes, not the first.*
☐	**8.7.**	Open a table with only placed/sent items. Press +.	*Nothing happens. No character typed in search.*
☐	**8.8.**	Mouse qty buttons (+/-) on cart items.	*Still work normally (unchanged).*

P9 | Key: Shift+Tab / Arrows / Enter | Category list navigation

☐	**9.1.**	From search, press Shift+Tab.	*Orange ring lands on the active category (e.g. "All").*
☐	**9.2.**	Press Down arrow twice.	*Ring moves down through categories.*
☐	**9.3.**	Press Enter.	*Category selected (grid filters). Cursor jumps back to search. Ring on first item in filtered grid.*
☐	**9.4.**	Press Space on a category.	*Same as Enter: category selected, cursor back to search.*
☐	**9.5.**	Mouse click on a category.	*Still works (unchanged). Grid filters normally.*

P10 | Key: Ctrl+Down / Arrows / +/- / Delete / Esc | Cart row navigation

☐	**10.1.**	Add 3 items. Press Ctrl+Down.	*Orange ring appears on the newest (bottom) item in the cart.*
☐	**10.2.**	Press Up arrow.	*Ring moves to the previous cart row.*
☐	**10.3.**	Press Down arrow.	*Ring moves to the next cart row.*
☐	**10.4.**	Press + twice on a cart row.	*That row qty goes up by 2.*
☐	**10.5.**	Press - until qty 1.	*Stops at 1. Does not remove.*

☐	**10.6.** Press Delete on an unplaced row.	*Row removed. Ring moves to next row (or search if last).*
☐	**10.7.** Press Esc.	*Cursor returns to search. Cart stays intact.*
☐	**10.8.** Open a table with placed (sent) items. Ctrl+Down. Press -.	*Cannot go below the sent qty. Delete does nothing on sent rows.*
☐	**10.9.** Press + on a sent row.	*Qty increases (for update). "Update Order" button appears.*

P11 | Key: F2 (Mac: fn+F2) | Jump to search from anywhere

☐	**11.1.** Click somewhere in the cart area or item grid. Press F2.	*Cursor jumps to search box. Any existing text is selected.*
☐	**11.2.** Open a popup (e.g. customization). Press F2.	*Nothing happens. F2 is blocked while popups are open.*
☐	**11.3.** Shortcuts OFF. Press F2.	*Nothing happens (or browser default F2 action).*

P12 | Key: F8 (Mac: fn+F8) | Place / Update Order

☐	**12.1.** New table, add 1 item. Press F8.	*Order placed (same as clicking Place Order). Only 1 API call even if pressed fast.*
☐	**12.2.** Busy table, add 1 new item. Press F8.	*"Update Order" fires. KOT prints for new item only.*
☐	**12.3.** Press F8 3 times quickly.	*Only 1 call fires (no duplicate orders).*
☐	**12.4.** No new items in cart. Press F8.	*Nothing happens (button disabled/absent).*
☐	**12.5.** Focus in customer name input. Press F8.	*Nothing happens (blocked in text inputs other than search).*

P13 | Key: F7 (Mac: fn+F7) | Reprint KOT

☐	**13.1.** Open a placed order. Press F7.	*KOT reprint fires. No Chrome "Caret Browsing" dialog appears.*
☐	**13.2.** Multi-station order: press F7.	*Station Picker opens. Tab/Space to toggle stations. Enter to confirm. Esc to cancel.*
☐	**13.3.** No placed order / button absent. Press F7.	*Nothing happens.*
☐	**13.4.** While Station Picker is open, press + or F2.	*Nothing happens. Shortcuts paused while picker is open.*

P14 | Key: F4 (Mac: fn+F4) | Print Bill

☐	**14.1.** Open a placed order with print permission. Press F4.	*Bill print fires. After print dialog closes, cursor returns to search.*
☐	**14.2.** New table, no placed items. Press F4.	*Nothing happens (no print button visible).*
☐	**14.3.** User without print permission. Press F4.	*Nothing happens (button absent).*

P15 | Key: F9 (Mac: fn+F9) | Collect Bill

☐	**15.1.** Open a served order. Press F9.	*Collect Bill panel opens.*
☐	**15.2.** Not served / unplaced items. Press F9.	*Nothing happens (button disabled).*
☐	**15.3.** With Collect Bill panel open, press F2 / F8 / arrows / +/-.	*All shortcuts are disabled while payment panel is open. Mouse payment flow works normally.*

P16 | Key: Esc | Smart exit from Order Entry

☐	**16.1.** Type text in search. Press Esc.	*Search clears. Still in order screen. Cursor in search.*
☐	**16.2.** Empty search, no items in cart. Press Esc.	*Order screen closes. Back to dashboard.*
☐	**16.3.** Add items (not placed). Press Esc.	*Confirmation dialog: "Unsaved items will be lost. Leave?" with [Stay] and [Leave].*
☐	**16.4.** On the confirm dialog, press Enter.	*Stay is selected (green button, default). Dialog closes. Cart intact. Still in order screen.*
☐	**16.5.** Press Esc again > confirm shows > press Esc.	*Same as Stay. Dialog closes. Cart intact.*
☐	**16.6.** Press Esc > confirm shows > Tab to Leave > Enter.	*Order screen closes. Back to dashboard. Unsaved items discarded.*
☐	**16.7.** Add items. Click the mouse Back button (top-left arrow).	*Leaves immediately WITHOUT confirmation dialog. (This is by design.)*

☐	**16.8.** Table with only placed items. Press Esc.	*Closes directly. No confirm (placed items are saved on server).*

P17 | Key: Esc in popups | Close popups with keyboard

☐	**17.1.** Open Customer modal (click customer button). Press Esc.	*Modal closes. Nothing saved.*
☐	**17.2.** Open Add Custom Item modal. Press Esc.	*Modal closes.*
☐	**17.3.** Open Order Notes modal. Press Esc.	*Modal closes. Notes not saved.*
☐	**17.4.** Open Item Notes modal (note icon on a cart item). Press Esc.	*Modal closes.*
☐	**17.5.** While any popup is open, press + or type characters.	*Characters go into the popup field. No qty changes or OE shortcuts fire.*

Global Regression: Shortcuts OFF

Toggle Keyboard Shortcuts OFF. Verify ALL of the following:

- No auto-focus on search when opening a table
- No orange rings on items or cart rows
- Enter in search does nothing
- +/- types normally in search (no qty change)
- Arrow keys move cursor in search (no grid nav)
- Ctrl+Down does nothing
- F2/F4/F7/F8/F9 do nothing (or browser defaults)
- Esc does NOT clear search or show confirm dialog
- All mouse interactions work exactly as before
- Tab does NOT trap inside order screen
