Menu Management — Screen Reference & Functional Guide

50 screens · every control described · narration-ready

All figures are sample data for illustration purposes only

v1.0 · 2026-09-27 · Screen Reference Guide · Layout: bottom

Menu Management — what it does

Menu Management is where the restaurant builds and maintains everything a guest can order: categories, items, prices, taxes, variations (sizes / spice levels), add-ons, images, channel availability (Dine-In, Delivery, Takeaway, Live Web) and the separate Aggregator menu that is pushed to Swiggy and Zomato. It offers three editing speeds — Quick Edit on the card, a Full Edit form, and a spreadsheet-style Bulk Editor with Excel import/export — plus drag-and-drop ordering that controls how the menu appears on the POS order screen.

WHO USES IT

Owner and Manager roles (permission 'food'). Typically used at menu launch, seasonal price revisions, daily out-of-stock marking, and when onboarding a new delivery aggregator.

KEY CAPABILITIES

- 1 Multiple menus** — Normal, Party, Premium, Aggregator — switched from one dropdown; a station picks its Active Menu in Local Settings
- 2 Categories** — create, rename, delete, assign a kitchen station / printer, drag to reorder
- 3 Items** — card view with search and Active / Inactive / Veg / Non-Veg / Egg / Jain filters; drag to reorder inside a category
- 4 Quick Edit** — the 12 most-changed fields inline on the card (price, tax, category, food type, flags)
- 5 Full Edit / Add Item** — image upload, description, pricing & tax, discounts, classification, availability window, variations, add-ons, operations timings & change status flags
- 6 Add-ons master** — one list of add-ons (price, weight, veg flag, inventory / recipe link) reused across items
- 7 Bulk Editor** — spreadsheet grid, column picker by tier, dirty-cell tracking, Validate Tax, multi-select delete with reason, Excel download (all / template) and upload
- 8 Aggregator menu** — Swiggy / Zomato sync flags, Swiggy-specific image, per-item stock ON / OFF with automatic turn-on time, Addon Stock and Variation Stock tabs

JOURNEY MAP (SCREEN NUMBERS)

Getting There

- 01 Opening Menu Management from the sidebar

Landing & Menus

- 02 Menu Management landing — Card View
- 03 Switching menus — Premium menu selected

Categories

- 04 Category column — search, counts and station
- 05 Category row hover — rename and delete
- 06 Rename a category / change its station
- 07 Delete a category — inline confirmation
- 08 Add Category form
- 09 Drag-and-drop category ordering

Items — Card View

- 10 Item cards — what each card tells you
- 11 Search and filter items
- 12 Item card hover — four action buttons
- 13 Drag-and-drop item ordering
- 14 Inactive item — how it looks
- 15 Quick Edit inline on the card
- 16 Delete an item — reason required

Full Edit / Add Item

- 17 Full Edit — name, unit, description and Item Image
- 18 Pricing & Tax and Classification sections
- 19 Availability & Channels — where and when it sells
- 20 Food Variations — sizes, portions, spice levels
- 21 Food Addons — attach existing or create new
- 22 Operations and Status & Flags sections
- 23 Add Item — blank form

Add-ons Master

- 24 Add-ons panel — the shared add-on list
- 25 Add-ons panel — creating a new add-on

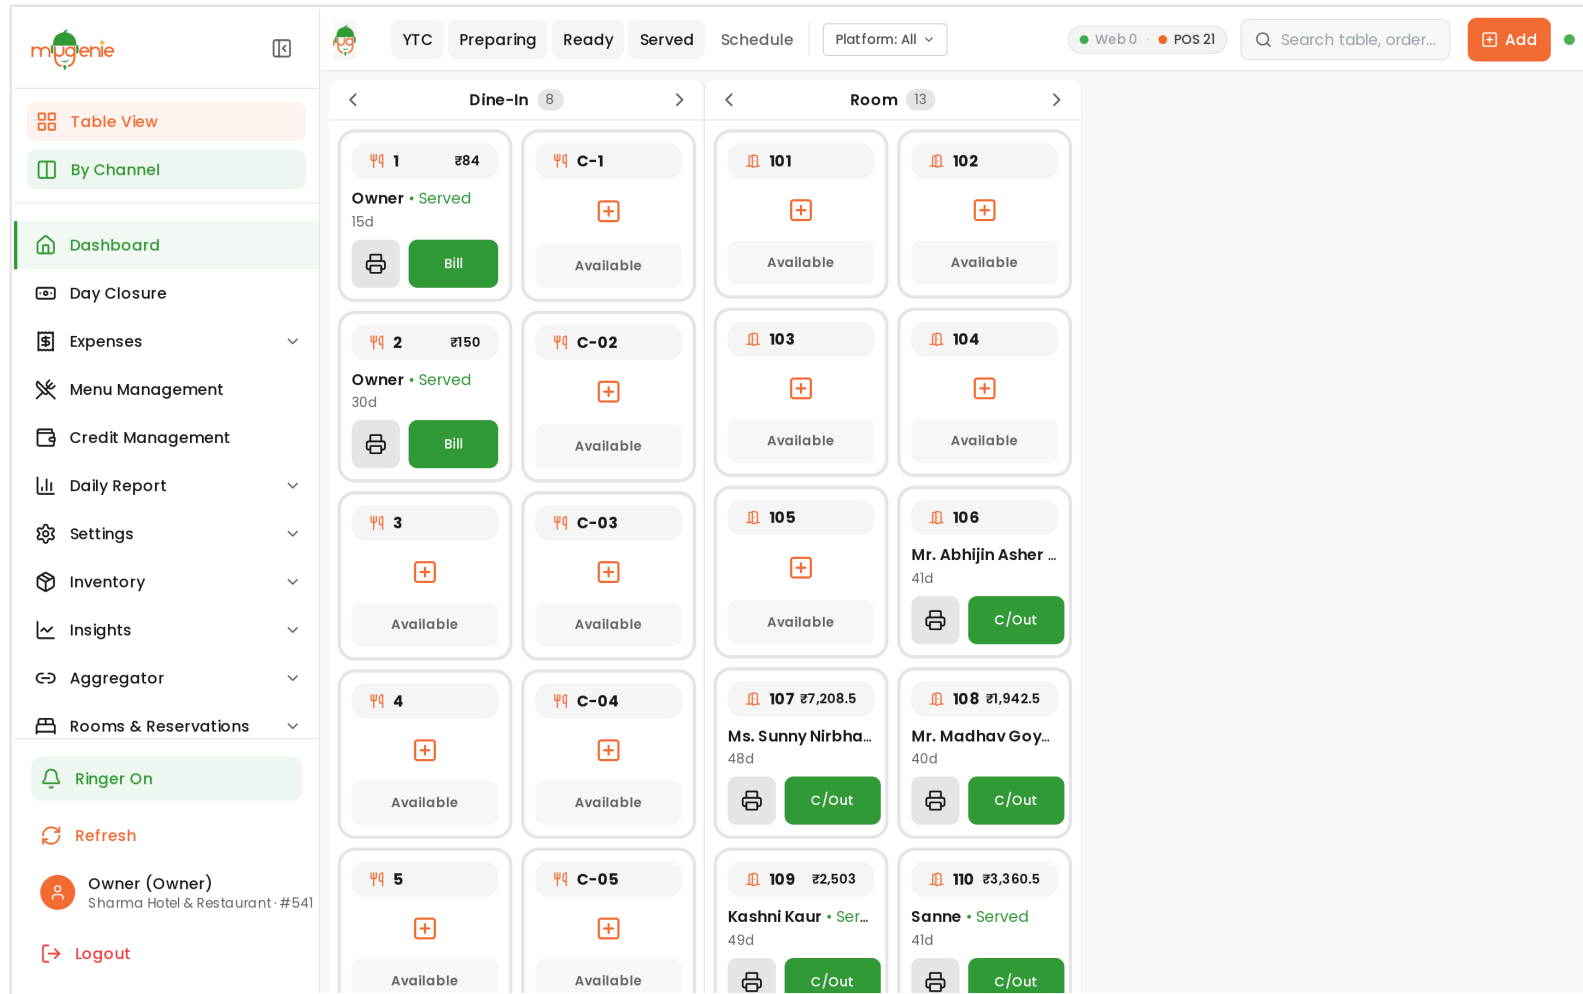

Bulk Editor

- 26 Bulk Editor — spreadsheet view of the whole menu
- 27 Column picker — choose which fields to edit
- 28 Download Excel — all items or blank template
- 29 Filter strip and inline cell editing
- 30 Add-ons and Variations expand inside a row
- 31 Multi-select rows — bulk delete banner
- 32 Bulk delete — reason dialog

Aggregator Menu (Swiggy / Zomato)

- 33 Aggregator menu — Card View
- 34 Item stock toggle — take offline until a time
- 35 Quick Edit on an aggregator item — Swiggy / Zomato / Brand
- 36 Full Edit on an aggregator item — Platform Sync and Swiggy image
- 37 Aggregator Stock — Addon Stock tab
- 38 Aggregator Stock — Variation Stock tab

Opening Menu Management from the sidebar

WHAT THIS SCREEN IS

Menu Management lives in the left navigation sidebar of the POS. With the sidebar expanded, the 'Menu Management' entry (fork-and-knife icon) is visible in the main list. Clicking it opens the module as a full page at /menu.

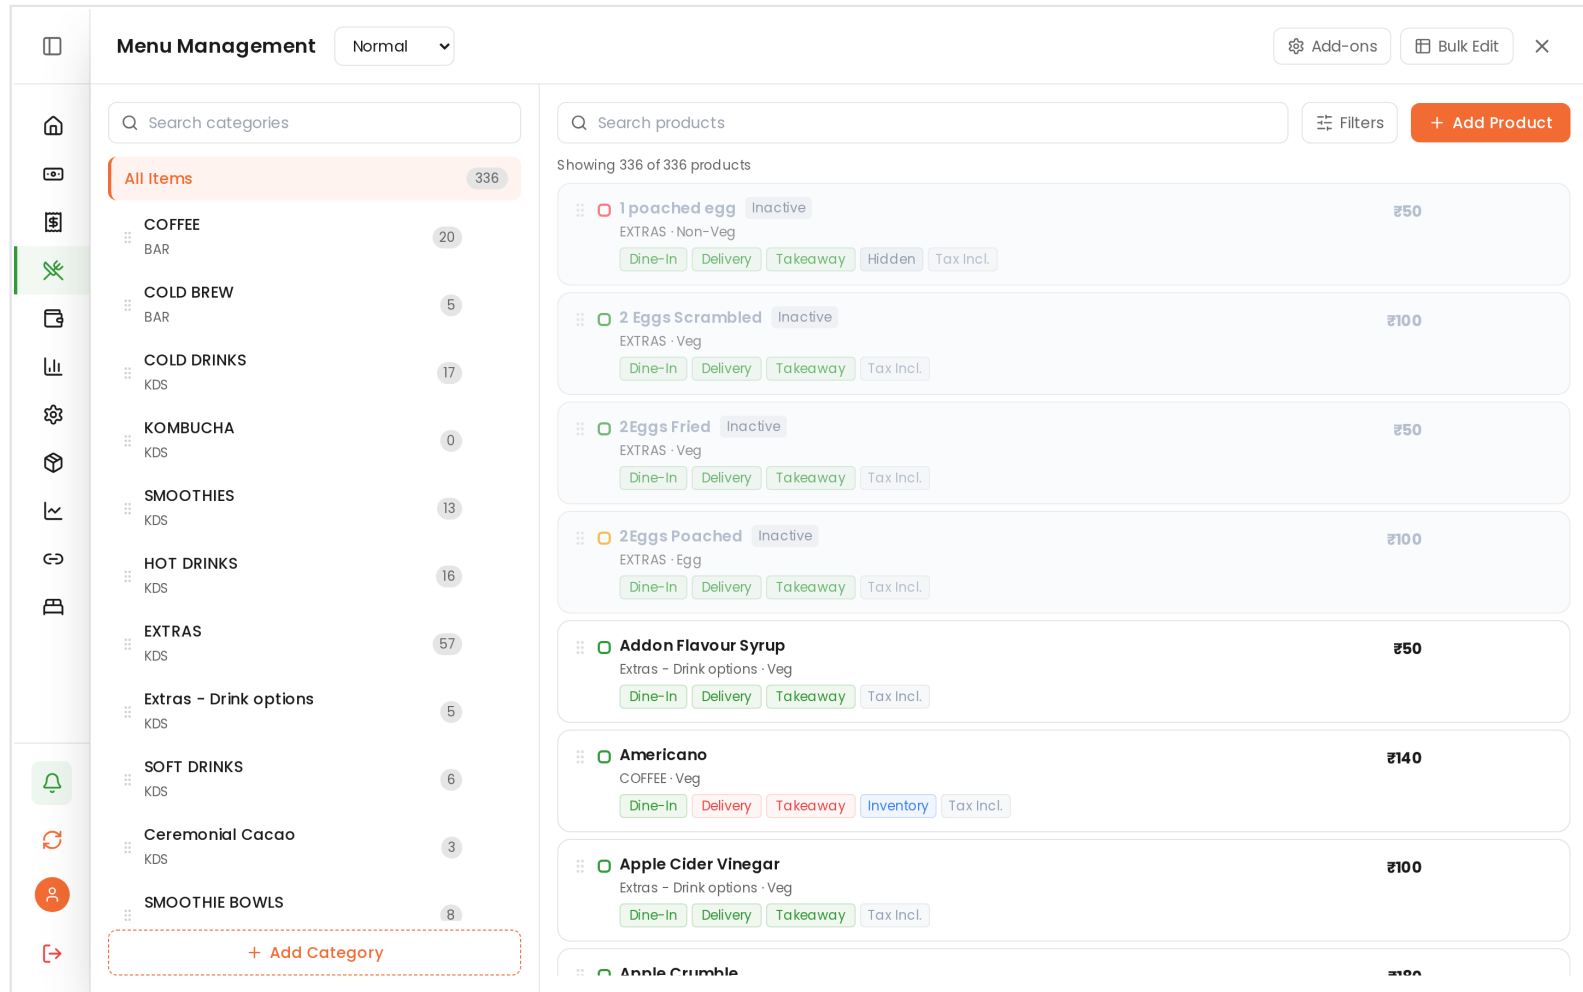

NARRATION (VIDEO SCRIPT)

From anywhere in MyGenie, open the sidebar and tap Menu Management. This is the home of every category, item, price and add-on your guests can order.

CONTROLS & ACTIONS

- 1 Sidebar expand / collapse arrow** — widens the sidebar to show labels next to icons
- 2 Menu Management entry** — opens the module; highlighted in orange when active
- 3 Restaurant profile block (bottom)** — shows the logged-in restaurant and role

Menu Management landing — Card View

WHAT THIS SCREEN IS

The default view. The left column (30%) lists categories with an item count badge; the right column (70%) shows item cards for the selected category ('All' by default). The header holds the menu-type dropdown and the three mode buttons: Add-ons, Bulk Edit and Close.

NARRATION (VIDEO SCRIPT)

This is the Card View. Categories on the left, items on the right. The dropdown at the top decides which menu you are editing.

CONTROLS & ACTIONS

- Menu type dropdown** — switches between Normal, Party, Premium and Aggregator menus; everything below reloads
- Add-ons button** — opens the add-ons master panel
- Bulk Edit button** — swaps the card view for the spreadsheet Bulk Editor (label becomes 'Card View' to switch back)
- Close (X)** — returns to the previous page
- Category column** — 'All' plus every category with its item count; click one to filter the cards
- Item column** — search box, Filters toggle and green '+ Add' button above the item cards
- Loading... indicator** — appears next to the title while items are being fetched

Switching menus — Premium menu selected

The screenshot shows the MyGenie Menu Management interface. The sidebar on the left contains navigation options: Table View, By Channel, Dashboard, Day Closure, Expenses, Menu Management, Credit Management, Daily Report, Settings, Inventory, Insights, Aggregator, and Rooms & Reservations. The main area displays a grid of menu items categorized under Dine-In (8) and Room (13). Each item card shows the item name, price, status (e.g., Served, Available), and a button to view the bill or c/out. The top bar includes tabs for YTC, Preparing, Ready, Served, and Schedule, along with a platform selector and a search bar.

WHAT THIS SCREEN IS

Each restaurant can run several menus. Selecting 'Premium' reloads categories, counts and cards for that menu only. Party and Premium menus are priced independently from Normal; Aggregator is the Swiggy / Zomato catalogue.

NARRATION (VIDEO SCRIPT)

Need a separate party or premium price list? Switch menus here. Every card and count you see now belongs to the Premium menu only.

CONTROLS & ACTIONS

- Menu type dropdown** — lists every menu configured for the restaurant (Normal / Party / Premium / Aggregator)
- Item counts** — recalculated for the chosen menu
- Item cards** — show the Premium prices and availability chips

Category column — search, counts and station

The screenshot displays the 'Menu Management' interface. On the left, the 'Category column' is visible, featuring a search bar, a list of categories with their counts and station labels, and an '+ Add Category' button. The categories listed are: COFFEE (20 items, BAR station), COLD BREW (5 items, BAR station), COLD DRINKS (17 items, KDS station), KOMBUCHA (0 items, KDS station), SMOOTHIES (13 items, KDS station), HOT DRINKS (16 items, KDS station), EXTRAS (57 items, KDS station), Extras - Drink options (5 items, KDS station), SOFT DRINKS (6 items, KDS station), Ceremonial Cacao (3 items, KDS station), and SMOOTHIE BOWLS (8 items, KDS station). The right side of the interface shows a list of products under the 'COFFEE' category, including Americano, Bumble, COCONUT ICED COFFEE, Cappuccino, Cortado Coffee, Decaf Americano, Decaf Cappuccino, and Decaf Latté, each with its price and available options (Dine-In, Delivery, Takeaway, Inventory, Tax Incl.).

WHAT THIS SCREEN IS

Categories are the top-level grouping guests see on the order screen. Each row shows the drag grip (⋮), the category name, the kitchen station / printer it routes to (small grey text) and a count badge of items in it. The list has its own search box and an '+ Add Category' button at the bottom.

NARRATION (VIDEO SCRIPT)

Categories drive both the guest-facing order screen and kitchen routing. The grey label under each name is the station its KOTs print to.

CONTROLS & ACTIONS

- 1 Search categories** — filters the list as you type
- 2 All** — clears the category filter and shows every item
- 3 Category row** — click to show only that category's items (row turns orange with a left bar)
- 4 Drag grip (left of each row)** — press-and-hold to reorder categories; the order is what the POS shows
- 5 Station label** — the printer / KDS station this category's KOTs go to
- 6 Count badge** — number of items in the category for the current menu
- 7 + Add Category** — opens the inline create form

Category row hover — rename and delete

The screenshot displays the 'Menu Management' interface. On the left, a sidebar contains icons for home, categories, items, settings, and other functions. The main area is titled 'Menu Management' with a 'Normal' dropdown. Below the title, there are search bars for 'Search categories' and 'Search products'. The 'Search categories' bar shows a list of categories: 'All Items' (336), 'COFFEE' (20), 'COLD BREW' (5), 'COLD DRINKS' (17), 'KOMBUCHA' (0), 'SMOOTHIES' (13), 'HOT DRINKS' (16), 'EXTRAS' (57), 'Extras - Drink options' (5), 'SOFT DRINKS' (6), 'Ceremonial Cacao' (3), and 'SMOOTHIE BOWLS' (8). The 'COFFEE' category is highlighted. On the right, the 'Search products' bar shows a list of products: 'Americano' (₹140), 'Bumble' (₹220), 'COCONUT ICED COFFEE' (₹250), 'Cappuccino' (₹160), 'Cortado Coffee' (₹150), 'Decaf Americano' (₹140), 'Decaf Cappuccino' (₹160), and 'Decaf Latte' (₹140). Each product row has a 'Dine-In' button, a 'Delivery' button, a 'Takeaway' button, an 'Inventory' button, and a 'Tax Incl.' button. The 'COFFEE' category row has a pencil icon (rename) and a trash icon (delete) next to it.

WHAT THIS SCREEN IS

Hovering a category row reveals its two actions on the right: a pencil (rename / change station) and a red trash (delete). Actions are hidden until hover to keep the list clean.

NARRATION (VIDEO SCRIPT)

Hover any category to reveal rename and delete. Nothing is deleted without a confirmation.

CONTROLS & ACTIONS

- 1 Pencil** — turns the row into an inline edit form (name + station dropdown)
- 2 Trash** — asks 'Delete?' inline with Yes / No before removing the category
- 3 Drag grip** — becomes fully visible on hover

Rename a category / change its station

Decaf Latte

WHAT THIS SCREEN IS

The inline edit form replaces the row: a text box for the name and a station dropdown (KDS or any configured printer station). The printer icon confirms which physical printer the station maps to. Save commits, Cancel or Escape discards.

NARRATION (VIDEO SCRIPT)

Renaming or re-routing a category to a different kitchen printer is a two-second inline edit.

CONTROLS & ACTIONS

- 1 Name input** — Enter saves, Escape cancels
- 2 Station dropdown** — KDS / kitchen / bar etc.; decides where KOTs for this category print
- 3 Printer hint** — shows the printer bound to the selected station, or a warning if none
- 4 Save** — writes the change and refreshes the list
- 5 Cancel** — discards

Delete a category — inline confirmation

The screenshot displays the 'Menu Management' interface. On the left, a sidebar contains icons for various menu functions. The main area is divided into two panels. The left panel, titled 'Menu Management', shows a list of categories with their item counts. The 'COFFEE' category is highlighted in orange, and a red confirmation strip appears below it with the text 'Delete?' and two buttons: 'No' and 'Yes'. The right panel, titled 'Search products', shows a list of products with their prices and availability status. The products listed are: Americano (₹140), Bumble (₹220), COCONUT ICED COFFEE (₹250), Cappuccino (₹160), Cortado Coffee (₹150), Decaf Americano (₹140), Decaf Cappuccino (₹160), and Decaf Latte (₹150). Each product has a status bar with 'Dine-In', 'Delivery', 'Takeaway', 'Inventory', and 'Tax Incl.' options.

Category	Item Count
All Items	336
COFFEE	20
COLD BREW	5
COLD DRINKS	17
KOMBUCHA	0
SMOOTHIES	13
HOT DRINKS	16
EXTRAS	57
Extras - Drink options	5
SOFT DRINKS	6
Ceremonial Cacao	3

Product	Price	Status
Americano	₹140	Dine-In, Delivery, Takeaway, Inventory, Tax Incl.
Bumble	₹220	Dine-In, Delivery, Takeaway, Tax Incl.
COCONUT ICED COFFEE	₹250	Dine-In, Delivery, Takeaway, Tax Incl.
Cappuccino	₹160	Dine-In, Delivery, Takeaway, Inventory, Tax Incl.
Cortado Coffee	₹150	Dine-In, Delivery, Takeaway, Inventory, Tax Incl.
Decaf Americano	₹140	Dine-In, Delivery, Takeaway, Inventory, Tax Incl.
Decaf Cappuccino	₹160	Dine-In, Delivery, Takeaway, Inventory, Tax Incl.
Decaf Latte	₹150	Dine-In, Delivery, Takeaway, Inventory, Tax Incl.

WHAT THIS SCREEN IS

Clicking the trash icon opens a small red confirmation strip under the row: 'Delete?' with No / Yes. Only Yes removes the category. (Not pressed in this guide.)

NARRATION (VIDEO SCRIPT)

Deleting asks for a confirmation right in place, so a stray click never removes a category.

CONTROLS & ACTIONS

- 1 Yes** — deletes the category (items must be moved first if any remain)
- 2 No** — closes the strip

Add Category form

The screenshot shows the 'Add Category' form in the MyGenie Menu Management system. The interface is divided into a sidebar and a main content area. The sidebar contains navigation options: Table View, By Channel, Dashboard, Day Closure, Expenses, Menu Management, Credit Management, Daily Report, Settings, Inventory, Insights, Aggregator, and Rooms & Reservations. The main content area displays a grid of category cards for 'Dine-In' and 'Room' sections. Each card shows a category name, status (e.g., 'Owner • Served'), a count, and an 'Add' button. The 'Dine-In' section has 5 cards, and the 'Room' section has 10 cards. The 'Add' button is highlighted in orange.

WHAT THIS SCREEN IS

The '+ Add Category' button opens an inline form at the bottom of the column: category name, station dropdown (defaults to KDS) and the printer hint. Add saves and the new category appears immediately with a 0 count.

NARRATION (VIDEO SCRIPT)

Adding a category is name plus station. The station matters: it decides which kitchen printer gets the ticket.

CONTROLS & ACTIONS

- 1 Category name** — required
- 2 Station dropdown** — choose the kitchen station for KOT routing
- 3 Printer hint** — which printer that station uses
- 4 Add** — creates the category
- 5 Cancel** — closes the form

Drag-and-drop category ordering

The screenshot shows the MyGenie Menu Management interface. The left sidebar contains navigation options: Table View, By Channel, Dashboard, Day Closure, Expenses, Menu Management, Credit Management, Daily Report, Settings, Inventory, Insights, Aggregator, and Rooms & Reservations. The main content area displays a grid of category cards for 'Dine-In' and 'Room' sections. The 'Dine-In' section has 5 rows, and the 'Room' section has 5 rows. Each row contains a category card with a status (e.g., 'Owner • Served', 'Available', 'c/out') and a 'Bill' or 'c/out' button. The 'Dine-In' section is currently selected, and the 'Room' section is visible in the background.

WHAT THIS SCREEN IS

Press-and-hold the grip and move the row. The lifted row turns light orange and the others shift to make room. Releasing saves the new order, which is the order guests and staff see on the order screen. There is no separate 'reorder' button — drag is always on.

NARRATION (VIDEO SCRIPT)

To reorder categories just grab the grip and drag. The lifted row glows orange; drop it where you want it and the POS follows that order.

CONTROLS & ACTIONS

- 1 Drag grip** — the only handle; press, move, release
- 2 Lifted row (orange tint)** — the category being moved
- 3 Gap** — where it will land on release

Item cards — what each card tells you

The screenshot displays the 'Menu Management' interface in 'Normal' view. On the left, a sidebar lists categories: All Items (336), COFFEE (20), COLD BREW (5), COLD DRINKS (17), KOMBUCHA (0), SMOOTHIES (13), HOT DRINKS (16), EXTRAS (57), Extras - Drink options (5), SOFT DRINKS (6), Ceremonial Cacao (3), and SMOOTHIE BOWLS (8). The main area shows a list of coffee products, each with a card containing a food-type square, item name, description, channel chips, and various badges.

Item Name	Description	Price	Channels	Badges
Americano	COFFEE · Veg	₹140	Dine-In, Delivery, Takeaway	Inventory, Tax Incl.
Bumble	COFFEE · Veg	₹220	Dine-In, Delivery, Takeaway	Tax Incl.
COCONUT ICED COFFEE	COFFEE · Veg	₹250	Dine-In, Delivery, Takeaway	Tax Incl.
Cappuccino	COFFEE · Veg	₹160	Dine-In, Delivery, Takeaway	Inventory, Tax Incl.
Cortado Coffee	COFFEE · Veg	₹150	Dine-In, Delivery, Takeaway	Inventory, Tax Incl.
Decaf Americano	COFFEE · Veg	₹140	Dine-In, Delivery, Takeaway	Inventory, Tax Incl.
Decaf Cappuccino	COFFEE · Veg	₹160	Dine-In, Delivery, Takeaway	Inventory, Tax Incl.
Decaf Latte	COFFEE · Veg	₹150	Dine-In, Delivery, Takeaway	Inventory, Tax Incl.

WHAT THIS SCREEN IS

With a category selected, each item is a card. Left to right: drag grip, food-type square (green veg / red non-veg / yellow egg / purple jain), item name with an 'Inactive' tag when switched off, the category · food-type line, and a row of chips: Dine-In / Delivery / Takeaway availability (green when on), plus Inventory, Packaged, Out of Stock, Hidden and Tax Incl. badges when applicable. The price sits on the right.

NARRATION (VIDEO SCRIPT)

Every card is a one-line status report: what kind of food it is, where it is sold, whether it is in stock, and what it costs.

CONTROLS & ACTIONS

- Food-type square** — colour-codes veg / non-veg / egg / jain
- Channel chips** — Dine-In, Delivery, Takeaway; green = item is sold on that channel
- Inventory badge** — item consumes stock from Inventory
- Packaged badge** — pre-packaged product (no kitchen prep)
- Out of Stock badge** — temporarily unavailable
- Hidden badge** — hidden from the POS order screen
- Tax Incl. badge** — price already includes tax
- Price** — base price in restaurant currency

Search and filter items

The screenshot displays the 'Menu Management' interface in 'Normal' view. On the left, a sidebar contains icons for home, categories, items, and a search icon. The main area is divided into two sections: 'Search categories' and 'Search products'.

Search categories: A list of categories with item counts: All Items (336), COFFEE BAR (20), COLD BREW BAR (5), COLD DRINKS KDS (17), KOMBUCHA KDS (0), SMOOTHIES KDS (13), HOT DRINKS KDS (16), EXTRAS KDS (57), Extras - Drink options KDS (5), SOFT DRINKS KDS (6), Ceremonial Cacao KDS (3), and SMOOTHIE BOWLS (8). A '+ Add Category' button is at the bottom.

Search products: A search bar, a 'Filters' button, and a '+ Add Product' button. Below the search bar, there are two rows of filters: Status (All, Active, Inactive) and Food type (All, Veg, Non-Veg, Egg, Jain). The 'Non-Veg' filter is selected. Below the filters, it says 'Showing 44 of 336 products'.

The product list shows the following items:

- 1 poached egg** (Inactive, EXTRAS · Non-Veg, ₹50). Options: Dine-In, Delivery, Takeaway, Hidden, Tax Incl.
- Balsamic And Olive Oil** (EXTRAS · Non-Veg, ₹100). Options: Dine-In, Delivery, Takeaway.
- Blue Tokai - Attikan Ground Cofee 1/2 kg** (FOR SALE · Non-Veg, ₹1000). Options: Dine-In, Delivery, Takeaway.
- Boiled Egg** (Inactive, EXTRAS · Non-Veg, ₹25). Options: Dine-In, Delivery, Takeaway.
- Caramelised Onion** (Inactive, EXTRAS · Non-Veg, ₹50). Options: Dine-In, Delivery, Takeaway, Tax Incl.
- Caramelized Onion** (EXTRAS · Non-Veg, ₹50). Options: Dine-In, Delivery, Takeaway, Tax Incl.
- Extra Cream** (EXTRAS · Non-Veg, ₹50).

WHAT THIS SCREEN IS

The search box matches item names live. The Filters button reveals two chip rows: Status (All / Active / Inactive) and Food type (All / Veg / Non-Veg / Egg / Jain). Filters combine with the selected category.

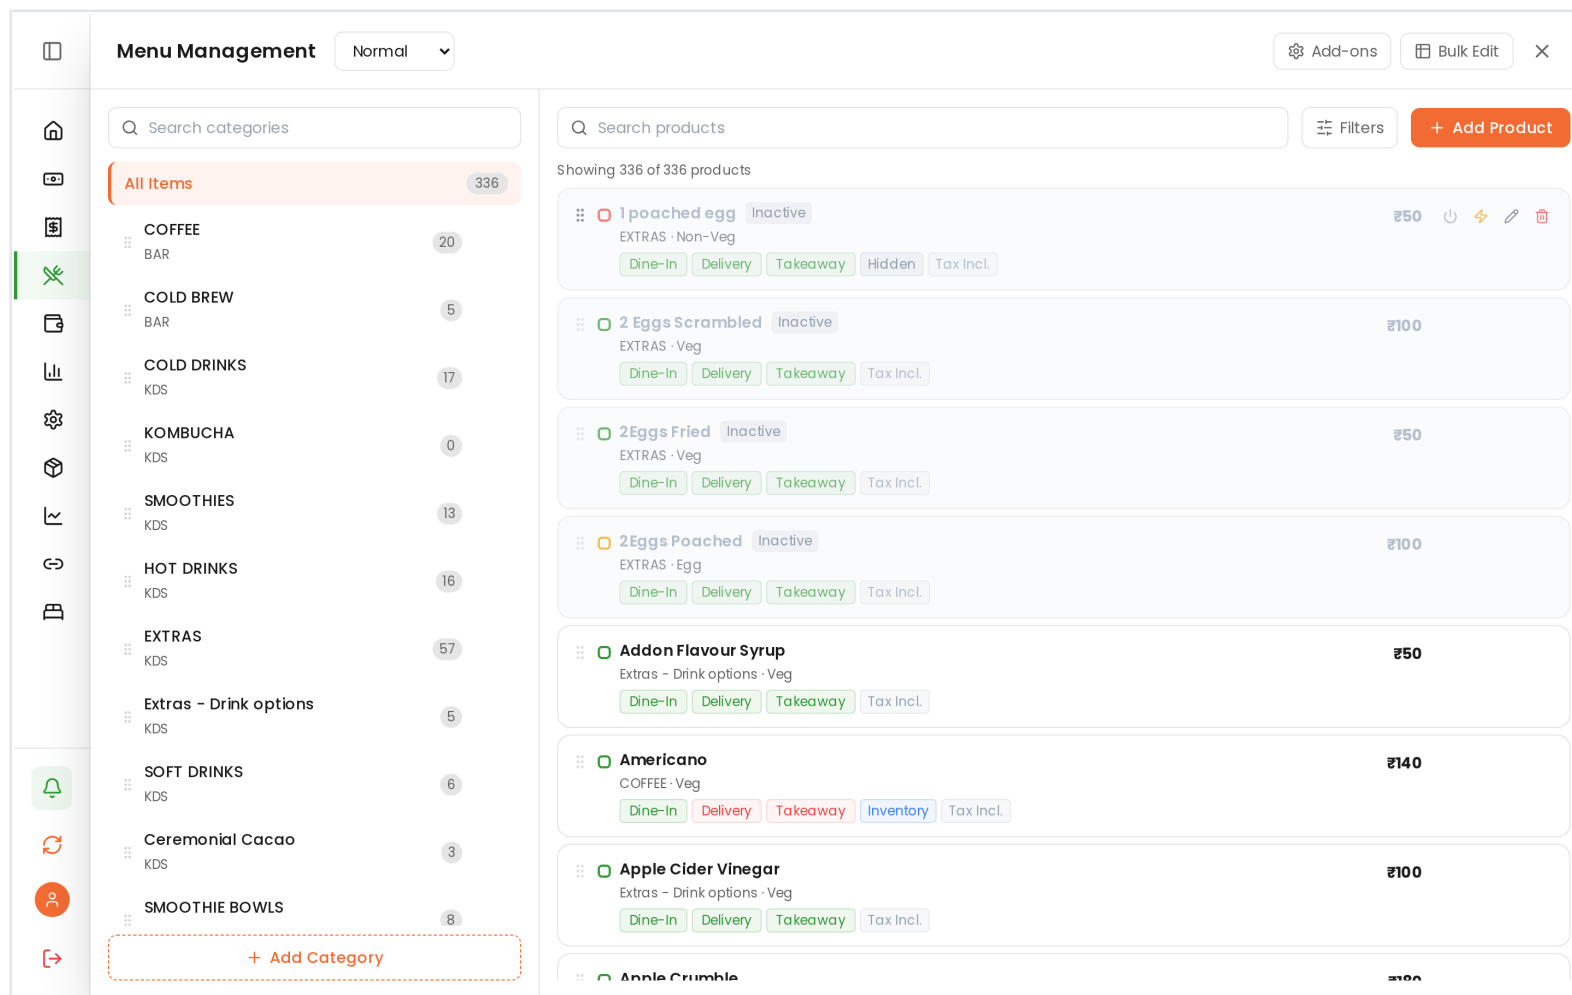

NARRATION (VIDEO SCRIPT)

Looking for every inactive non-veg item? Open Filters, tap Inactive and Non-Veg, and the list narrows instantly.

CONTROLS & ACTIONS

- 1 Search products** — live text filter on item name
- 2 Filters toggle** — shows / hides the chip rows (orange when open)
- 3 Status chips** — All, Active, Inactive
- 4 Food type chips** — All, Veg, Non-Veg, Egg, Jain (each in its colour)
- 5 + Add** — opens the blank Add Item form

Item card hover — the four action buttons

WHAT THIS SCREEN IS

Hovering a card reveals four icon buttons at the right edge, next to the price: Power (Activate / Deactivate), Lightning (Quick Edit), Pencil (Full Edit) and Trash (Delete). The drag grip on the left also becomes fully visible.

NARRATION (VIDEO SCRIPT)

Hover a card and four buttons appear: switch it on or off, quick edit, full edit, or delete. The grip on the left lets you drag it.

CONTROLS & ACTIONS

- 1 Power (green)** — toggles the item Active / Inactive instantly, no form
- 2 Lightning (amber)** — opens Quick Edit inline on the card
- 3 Pencil (grey)** — opens the Full Edit form for every field
- 4 Trash (red)** — opens the delete-with-reason confirmation
- 5 Drag grip** — press-and-hold to reorder the item within its category

Drag-and-drop item ordering

The screenshot displays the 'Menu Management' interface in 'Normal' view. On the left, a sidebar lists categories with their item counts: All Items (336), COFFEE BAR (20), COLD BREW BAR (5), COLD DRINKS KDS (17), KOMBUCHA KDS (0), SMOOTHIES KDS (13), HOT DRINKS KDS (16), EXTRAS KDS (57), Extras - Drink options KDS (5), SOFT DRINKS KDS (6), Ceremonial Cacao KDS (3), and SMOOTHIE BOWLS (8). A '+ Add Category' button is at the bottom. The main area shows a list of products under the 'All Items' category. The product '1 poached egg' is highlighted with an orange border, indicating it is being moved. Other products include '2 Eggs Scrambled', '2 Eggs Fried', '2 Eggs Poached', 'Addon Flavour Syrup', 'Americano', 'Apple Cider Vinegar', and 'Apple Crumble'. Each product card shows its name, status (Inactive), extras, and price.

WHAT THIS SCREEN IS

Same gesture as categories: hold the grip on a card and move it. The card turns orange while lifted; releasing writes the new sort order for that category so the POS shows items in this sequence.

NARRATION (VIDEO SCRIPT)

Put your best-sellers at the top: hold the grip, drag the card, release. The POS order screen follows this order.

CONTROLS & ACTIONS

- 1 Drag grip** — press-and-hold, move, release
- 2 Lifted card (orange border)** — item being moved
- 3 Gap** — landing position

Inactive item — how it looks

WHAT THIS SCREEN IS

An item switched off with the Power button stays in the list but is greyed out, gets an 'Inactive' tag next to its name and its price is dimmed. It will not appear on the POS order screen until switched back on. Filtering by Status = Inactive lists them all.

NARRATION (VIDEO SCRIPT)

Switched-off items stay visible to managers but vanish from the order screen. One tap on the power icon brings them back.

CONTROLS & ACTIONS

- Inactive tag** — grey pill next to the name
- Dimmed card** — 70% opacity, grey background
- Power button** — re-activates on click

Quick Edit — inline on the card

The screenshot shows the 'Menu Management' interface in 'Normal' view. On the left is a sidebar with category icons and a list of categories: COFFEE (20), COLD BREW (5), COLD DRINKS (17), KOMBUCHA (0), SMOOTHIES (13), HOT DRINKS (16), EXTRAS (57), Extras - Drink options (5), SOFT DRINKS (6), Ceremonial Cacao (3), and SMOOTHIE BOWLS (8). A '+ Add Category' button is at the bottom. The main area has a search bar for products and a list of 336 products. A 'Quick Edit' form is overlaid on a product card for '1 poached egg'. The form fields are: Name (1 poached egg), Sold By (Piece), Category (EXTRAS), Price (₹ 50), Food Type (Non-Veg), Complementary (No), Tax Type (GST), Tax % (5), Tax Calc (Inclusive), Inventory (No), and Packaged (No). 'Cancel' and 'Save' buttons are at the bottom right of the form. Below the form, three product cards are visible: '2 Eggs Scrambled' (₹100), '2 Eggs Fried' (₹50), and '2 Eggs Poached' (₹100), all marked as 'Inactive'.

WHAT THIS SCREEN IS

Quick Edit expands the card into a compact form with the fields that change most often: Name, Sold By (unit), Category (with a '+' to create one), Price, Food Type, Complementary, Tax Type / Tax %, Tax Calc (Inclusive / Exclusive), Inventory and Packaged. Save writes immediately; Cancel collapses the card unchanged.

NARRATION (VIDEO SCRIPT)

For a price or tax change you do not need the full form. Quick Edit puts the twelve everyday fields right on the card.

CONTROLS & ACTIONS

- 1 **Name** — item name
- 2 **Sold By (Unit)** — Piece / Kg / Ltr etc.
- 3 **Category dropdown + '+'** — move the item or create a new category on the spot
- 4 **Price** — base price
- 5 **Food Type** — Veg / Non-Veg / Egg / Jain
- 6 **Complementary** — Yes / No (free item)
- 7 **Tax Type** — GST / VAT / None, with Tax %
- 8 **Tax Calc** — Inclusive or Exclusive of the price
- 9 **Inventory / Packaged** — Yes / No flags
- 10 **Save (green)** — commits; Cancel — discards

Delete an item — reason required

The screenshot shows the 'Menu Management' interface in 'Normal' view. On the left, a sidebar lists categories: All Items (336), COFFEE (20), COLD BREW (5), COLD DRINKS (17), KOMBUCHA (0), SMOOTHIES (13), HOT DRINKS (16), EXTRAS (57), Extras - Drink options (5), SOFT DRINKS (6), Ceremonial Cacao (3), and SMOOTHIE BOWLS (8). The main area displays a list of products. The product '2 Eggs Scrambled' (Inactive, ₹100) is selected, and a red confirmation strip is visible. The strip contains the text 'Delete "2 Eggs Scrambled"?' and a dropdown menu labeled 'Select reason...'. Below the strip are 'Cancel' and 'Delete' buttons. Other products listed include '1 poached egg' (Inactive, ₹50), '2 Eggs Fried' (Inactive, ₹50), '2 Eggs Poached' (Inactive, ₹100), 'Addon Flavour Syrup' (₹50), and 'Americano' (₹140).

WHAT THIS SCREEN IS

The trash button opens a red confirmation strip inside the card: 'Delete "item"?' with a mandatory reason dropdown (reasons come from the restaurant's configured list). The Delete button stays disabled until a reason is chosen. (Not pressed in this guide.)

NARRATION (VIDEO SCRIPT)

Deleting an item always records why. Pick a reason, then confirm — or cancel.

CONTROLS & ACTIONS

- Reason dropdown** — mandatory; pre-configured delete reasons
- Delete (red)** — enabled only after a reason is selected
- Cancel** — closes the strip

WHAT THIS SCREEN IS

The Full Edit form (pencil on a card, or '+ Add' for a new item) replaces the item column. The top block holds Name, Sold By (Unit), Description and the Item Image uploader: a thumbnail preview with an X to remove and an Upload / Change button that accepts any image file. Below it the form is organised into collapsible sections.

NARRATION (VIDEO SCRIPT)

The Full Edit form covers everything. Start at the top: name, unit, description and the photo guests will see online.

CONTROLS & ACTIONS

- Back arrow** — returns to the card list without saving
- Name** — required
- Sold By (Unit)** — Piece / Kg / Ltr / Plate etc.
- Description** — shown to guests on Live Web and aggregators
- Item Image: Upload / Change** — picks an image file; preview appears at once
- Item Image: X** — removes the current image
- Section headers** — click to expand / collapse each group of fields
- Save (bottom)** — writes all sections in one call

WHAT THIS SCREEN IS

Pricing & Tax: Category (required), Price, Tax Type (GST / VAT / None) with Tax %, and an Allow Discount toggle that reveals Discount amount + Type (flat / percent). Classification: Item Code, Food Type selector, Allergens text and Kcal.

NARRATION (VIDEO SCRIPT)

Pricing and tax live together: price, GST or VAT and the rate. Allow Discount lets this item accept a flat or percentage discount.

CONTROLS & ACTIONS

- Category** — required dropdown
- Price** — base selling price
- Tax Type + Tax %** — GST / VAT / None and the rate
- Allow Discount** — toggle; when on, Discount and Type (Flat / Percent) appear
- Item Code** — internal SKU / code
- Food Type** — Veg / Non-Veg / Egg / Jain
- Allergens** — free text, e.g. Milk, Nuts
- Kcal** — calorie value shown to guests

WHAT THIS SCREEN IS

Four channel toggles decide where the item is orderable: Dine-In, Delivery, Takeaway and Live Web (online ordering). Available From / Until define a daily time window (e.g. breakfast items 07:00–11:00); outside it the item is hidden on the order screen.

NARRATION (VIDEO SCRIPT)

Decide where and when the item is sold: any mix of Dine-In, Delivery, Takeaway and web, and an optional daily time window.

CONTROLS & ACTIONS

- Dine-In** — sell on table orders
- Delivery** — sell on delivery orders
- Takeaway** — sell on parcel / pickup orders
- Live Web (Online Ordering)** — publish on the restaurant's web ordering page
- Available From / Available Until** — daily time window (24h)

WHAT THIS SCREEN IS

A variation is a named group of options a guest must (or may) choose from — Size: Regular / Large, Spice: Mild / Hot. Each group has a name, Single or Multi select, a Required checkbox, Min / Max picks for multi, and a list of options each with its own extra price. Groups and options can be added or deleted freely.

NARRATION (VIDEO SCRIPT)

Variations turn one item into many: sizes, portions or spice levels, each with its own price. Mark a group Required and the cashier must pick before adding.

CONTROLS & ACTIONS

- Variation name** — e.g. Size, Spice Level
- Single / Multi** — one choice or several
- Required** — guest must choose before adding to order
- Min / Max (multi only)** — bounds on number of picks
- Option rows** — label + extra price; trash removes an option
- + Add option** — new option row
- + Add New Variation** — new group
- Group trash** — removes the whole variation

Operations

Cancel Save Changes

WHAT THIS SCREEN IS

Add-ons are optional extras (extra cheese, fries) drawn from the restaurant's Add-ons master. The section lists every add-on with a checkbox and price; ticked ones are offered with this item. Below the list a mini-form creates a brand-new add-on (name, Veg / Non-Veg, price) without leaving the item.

NARRATION (VIDEO SCRIPT)

Tick the add-ons this item can carry. Need a new one? Create it right here — it lands in the master list for every other item too.

CONTROLS & ACTIONS

- 1 Add-on checkboxes** — tick to attach; badge shows how many are selected
- 2 New add-on name** — text
- 3 Veg / Non-Veg** — dropdown
- 4 Price** — extra charge
- 5 Add** — creates the add-on in the master and refreshes the list

WHAT THIS SCREEN IS

Operations holds kitchen timing and per-item charges: Prep Time and Serve Time in minutes (feed the KDS and prep-time reports), Pack Charges, Takeaway Charge and Delivery Charge. Status & Flags has five toggles: Complementary, Inventory Item, Packaged Item, Out of Stock and Hidden from POS.

NARRATION (VIDEO SCRIPT)

Operations sets prep and serve times plus packing and delivery charges. Status & Flags is where you mark an item out of stock or hide it from the POS.

CONTROLS & ACTIONS

- 1 Prep Time (min)** — expected kitchen time; drives KDS colour and reports
- 2 Serve Time (min)** — expected time to table
- 3 Pack Charges / Takeaway Charge / Delivery Charge** — per-item add-on charges by channel
- 4 Complementary** — item is offered free
- 5 Inventory Item** — consumes stock from the Inventory module
- 6 Packaged Item** — pre-packaged, no kitchen ticket
- 7 Out of Stock** — temporarily unavailable; shows a red badge
- 8 Hidden from POS** — keep in the menu but hide from order taking
- 9 Save Item** — commits every section

Add Product

WHAT THIS SCREEN IS

The green '+ Add' button above the cards opens the same form empty. Required fields are Name, Category and Price; everything else has sensible defaults (GST, Exclusive tax, all channels on). Saving creates the item in the currently selected menu.

NARRATION (VIDEO SCRIPT)

Adding a new dish starts from the plus button. Fill name, category and price — the rest is optional — and save.

CONTROLS & ACTIONS

- + Add (card view)** — opens this blank form
- Required: Name, Category, Price**
- Defaults** — Food Type Veg, Tax Type GST, all channels on, no variations / add-ons
- Save Item** — creates the item in the active menu type

Add-ons panel — the shared add-on list

WHAT THIS SCREEN IS

The Add-ons button in the header opens the master list. Every add-on has a name, price, weight in grams, Veg / Non-Veg flag, an Inventory checkbox (deduct stock) and, when a recipe is attached, recipe-linked costing. Add-ons defined here are what items pick from in their Food Addons section.

NARRATION (VIDEO SCRIPT)

Add-ons are managed once, here, and reused across every item. Price, weight, veg flag and whether it draws from inventory.

CONTROLS & ACTIONS

- 1 Search add-ons — live filter
- 2 + Add add-on — inline row: Name, Price, Weight g, Veg / Non-Veg
- 3 Pencil — edit a row inline
- 4 Inventory checkbox — deduct from stock when sold (needs a recipe first)
- 5 Trash — delete the add-on
- 6 Close — back to Card View

Add-ons panel — creating a new add-on

WHAT THIS SCREEN IS

Clicking '+ Add' inserts an editable row at the top: Name, Price, Weight (g) and Veg / Non-Veg. Save creates it; Cancel discards. The new add-on is instantly available to every item.

NARRATION (VIDEO SCRIPT)

A new add-on is a single row: name, price, weight, veg flag, save.

CONTROLS & ACTIONS

- 1 Name** — required
- 2 Price** — extra charge when chosen
- 3 Weight g** — for portion / inventory maths
- 4 Veg / Non-Veg** — dropdown
- 5 Save / Cancel**

WHAT THIS SCREEN IS

Bulk Edit turns the menu into an editable grid: one row per item, one column per field. Cells edit in place; changed cells turn orange and the Save button shows a count. The toolbar offers Search, Columns, Download Excel, Upload Excel, + Add Row, Validate Tax and Save Changes.

NARRATION (VIDEO SCRIPT)

When you have a hundred prices to change, use the Bulk Editor. Edit cells like a spreadsheet, then save everything at once.

CONTROLS & ACTIONS

- Search items** — filters rows
- Columns** — picker to show / hide columns by tier
- Download Excel** — All items, or a blank Template
- Upload Excel** — import an .xlsx to add / update items
- + Add Row** — new blank item row
- Validate Tax** — checks tax type / % consistency across rows
- Save Changes (n)** — writes every dirty row in one go
- Select-all checkbox** — for multi-select delete
- Img / Name / Category / Price / Add-ons / Variations / Status / Type / Tax columns** — tier-1 defaults
- Card View** — back to cards

WHAT THIS SCREEN IS

Columns are grouped in tiers: Tier 1 essentials (name, category, price, tax, status), Tier 2 channels & flags, Tier 3 operations & charges, Tier 4 nutrition. Tick a column to add it to the grid; Name and Image are always shown.

NARRATION (VIDEO SCRIPT)

Only see what you are editing. The column picker shows fields by tier — from essentials to nutrition.

CONTROLS & ACTIONS

- 1 **Tier groups** — expand to see the columns in each
- 2 **Checkbox per column** — show / hide
- 3 **Always visible** — Img and Name cannot be hidden

Download Excel — all items or blank template

The screenshot shows the 'Menu Management' Bulk Editor interface. At the top, there's a 'Menu Management' header with a 'Normal' dropdown. Below it, a 'Bulk Editor' section shows '336 items' and a search bar. A dropdown menu is open, showing 'Export All Items (.xlsx)' and 'Download Template (.xlsx)'. The main table displays menu items categorized by 'BEER', 'BRANDY', and 'BRUNCH'. Each item row includes columns for selection, ID, image, name, category, price, add-ons, variations, status, type, tax type, tax %, packaged item, and inventory.

#	IMG	NAME	CATEGORY	PRICE	ADD-ONS	VARIATIONS	STATUS	TYPE	TAX TYPE	TAX %	PACKAGED ITEM	INVENTORY

14		Eggs Benny	BRUNCH	350	21 add-ons	2 groups	Active	Veg	GST	5	No	No

WHAT THIS SCREEN IS

The Download Excel menu exports the grid to .xlsx. 'Export all' writes every item with its current values (ideal for offline price revisions); 'Template' writes only the headers for adding brand-new items. Both files re-import through Upload Excel.

NARRATION (VIDEO SCRIPT)

Take the menu to Excel, change prices offline, upload it back. The template gives you the exact columns for new items.

CONTROLS & ACTIONS

- Export all items** — full menu as Excel
- Export template** — headers only, for new items
- Upload Excel** — imports .xlsx / .xls; a confirmation dialog summarises adds vs updates before anything is written

WHAT THIS SCREEN IS

The filter strip narrows rows by category and by quick chips (e.g. Active, Inactive, Veg). Any cell can be edited directly: text and numbers by typing, dropdowns by selecting, Yes / No flags by clicking. A changed cell is tinted orange until saved; Reset All undoes everything.

NARRATION (VIDEO SCRIPT)

Filter down to the rows you need, edit cells in place — orange means unsaved — and commit with Save.

CONTROLS & ACTIONS

- Category select** — show one category's rows
- Quick chips** — status / food-type filters
- Clear** — removes all filters
- Cell edit** — click a cell and type or pick
- Orange cell** — unsaved change
- Reset All / Save (footer)** — discard or commit all dirty rows

Add-ons and Variations expand inside a row

The screenshot displays the 'Menu Management' Bulk Editor interface. At the top, there's a 'Menu Management' header with a 'Normal' dropdown and buttons for 'Add-ons', 'Card View', and a close icon. Below this is a 'Bulk Editor' section showing '336 items', a search bar with 'Avocado and Feta', and buttons for 'Columns' (12), 'Excel', 'Import', 'Add Item', 'Validate Tax', and 'No Changes'. A filter bar shows 'Status: All' (selected), 'Active', 'Inactive', 'Type: All' (selected), 'Veg', 'Non-Veg', 'Egg', 'Jain', and 'Category: All Categories'. An 'Editing:' bar lists various fields like 'Img', 'Name', 'Category', 'Price', 'Add-ons', 'Variations', 'Status', 'Type', 'Tax Type', 'Tax %', 'Packaged Item', and 'Inventory'. The main table has columns: #, IMG, NAME, CATEGORY, PRICE, ADD-ONS, VARIATIONS, STATUS, TYPE, TAX TYPE, TAX %, PACKAGED ITEM, and INVENTORY. The first row is 'Avocado and Feta Toast' (TOAST, 300, 17 add-ons, 1 group, Active, Veg, GST, 5, No, No). Below the row, an expanded panel titled 'Add-ons Avocado and Feta Toast' (Check/uncheck to assign - 41 available) shows a grid of add-on checkboxes with prices, such as '2 eggs boiled ₹50', '2 eggs fried ₹50', '2 eggs poached ₹100', '2 eggs scrambled ₹100', 'Avacado ₹100', 'Baileys 30ml ₹200', 'Baileys (30ml) ₹200', 'C-Honey ₹0', 'C-Milk ₹0', 'Cureveda Vegan Pea Protein Choclate ₹120', 'Cureveda Vegan Pea Protein Vanilla ₹120', 'Dates Syrup ₹0', 'Extra Mango ₹100', 'Extra Shot ₹50', 'extra slice of bread ₹50', 'Feta ₹100', 'Fried Tomatoes ₹50', 'Garlic Aioli ₹50', 'Garlic ketchup ₹0', 'Garlic Mayo ₹50', 'Garlic Vegan Mayo ₹50', 'Gherkins ₹50', 'Home made Granola ₹50', 'Homemade granola ₹50', 'homemade jam ₹0', 'Honey ₹50', 'Kahala (30ml) ₹200', 'Kahlua 30 ml ₹200', 'Mango Chutney ₹50', 'masala ₹50', 'milk ₹50', 'Papaya Chutney ₹50', 'peanut butter ₹0', 'sauteed spinach ₹50', 'Scrambled Tofu ₹150', 'Single Shot Espresso ₹0', 'Slice of Multiseed Loaf ₹50', 'Swap Egg for Tofu ₹0', 'Tamato Ketchup ₹0', 'tomato relish ₹50', and 'vegan almond feta ₹100'. At the bottom of the panel are 'Apply Changes' and 'Cancel' buttons, and a note: 'Use Bulk Save toolbar to push changes to API'.

WHAT THIS SCREEN IS

The Add-ons and Variations columns show a count chip. Clicking the chip expands a panel under the row: for add-ons, checkboxes for every master add-on; for variations, the groups and options with prices. This lets you attach add-ons or review variations for many items without opening each Full Edit form.

NARRATION (VIDEO SCRIPT)

Attach add-ons in bulk: click the chip on any row, tick the add-ons, move to the next row.

CONTROLS & ACTIONS

- 1 Add-ons chip** — click to expand the add-on checklist
- 2 Variations chip** — click to expand variation groups (disabled when 0)

3 items selected

Clear

Delete Selected (3)

WHAT THIS SCREEN IS

Ticking row checkboxes shows an orange banner with the selected count and a 'Delete selected' button. Deleting opens a dialog that requires a reason (same list as single delete). Clear deselects everything. (Dialog is cancelled in this guide.)

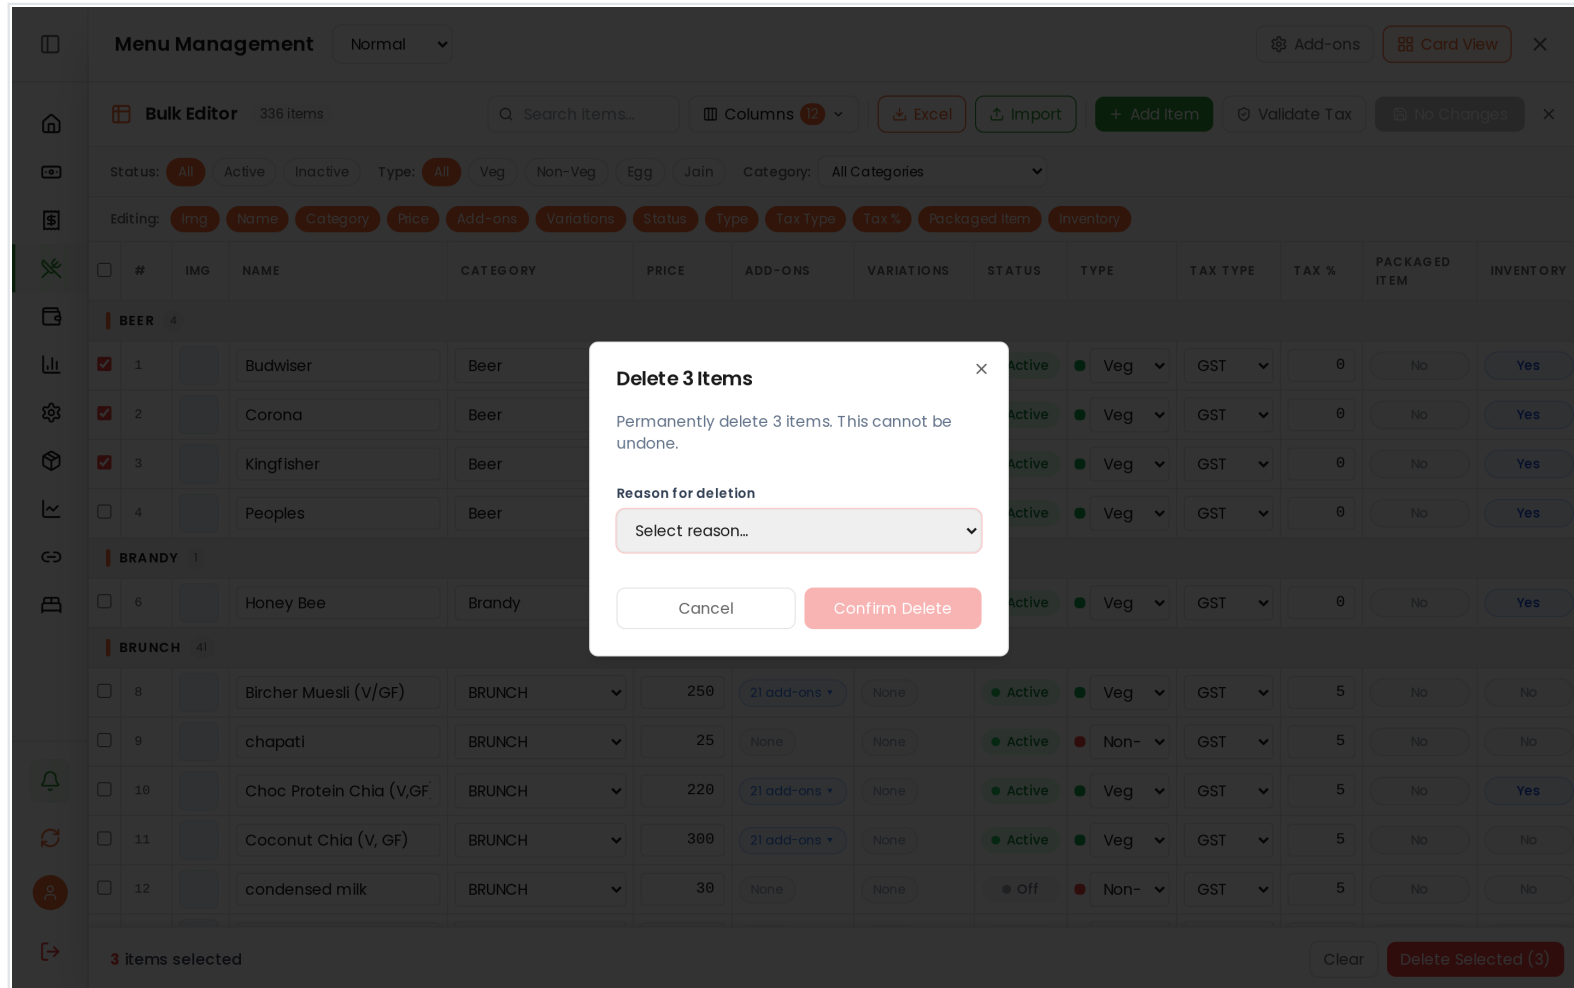

NARRATION (VIDEO SCRIPT)

Retiring a whole section of the menu? Tick the rows, hit Delete selected, give a reason.

CONTROLS & ACTIONS

- Row checkbox** — select an item
- Select-all checkbox (header)** — select every visible row
- Banner count** — how many are selected
- Delete selected** — opens the reason dialog
- Clear** — deselect all

Bulk delete — reason dialog

WHAT THIS SCREEN IS

The confirmation dialog names how many items will be deleted and asks for a reason from the configured list. Confirm is disabled until a reason is chosen; Cancel closes without changes.

NARRATION (VIDEO SCRIPT)

Bulk delete still needs a reason — the same audit trail as deleting one item.

CONTROLS & ACTIONS

- 1 Reason for deletion — dropdown, mandatory
- 2 Confirm delete — enabled after a reason is picked
- 3 Cancel — closes the dialog

- Kunafa Tubs (4)
- + Add Category

WHAT THIS SCREEN IS

Selecting 'Aggregator' in the menu dropdown shows the catalogue that syncs to Swiggy and Zomato. Cards swap the Dine-In / Delivery / Takeaway chips for Swiggy and Zomato chips (green = listed) and gain a stock pill on the right ('Live' or 'Off' · back at HH:MM). An 'Aggregator Stock' button appears in the header. When the restaurant runs sub-brands, a Brand selector (All / Main Branch / brand) also appears.

NARRATION (VIDEO SCRIPT)

The Aggregator menu is what Swiggy and Zomato customers see. Each card shows its platform listing and a live stock pill.

CONTROLS & ACTIONS

- Menu type = Aggregator** — switches to the aggregator catalogue
- Swiggy / Zomato chips** — whether the item is listed on each platform
- Stock pill** — click to take the item offline / online on the aggregators
- Offline · Back at ... badge** — item is off with an automatic turn-on time
- Aggregator Stock button** — opens Addon Stock / Variation Stock tabs
- Brand selector** — filter by sub-brand (only when sub-brands exist)

Item stock toggle — take offline until a time

The screenshot displays the 'Menu Management' interface for an aggregator menu (Swiggy/Zomato). The left sidebar shows a list of categories: All Items (108), Coffee Essential (8), Kunafa Bomb (1), Authentic Kunafa (5), Milkshake (4), Exotic Kunafas (8), Indo-Fusion Kunafa (4), Koshari (6), Salankatia (5), Kunafa Cones (6), Loua (4), and Kunafa Tubs (4). The main area shows a list of products with their status (Live/Inactive/Offline) and price. A popover titled 'Disable on UrbanPiper' is open for the '50-50 Kunafa' item, showing options to turn it off indefinitely or for a specific duration (30 minutes to 7 days, or custom date/time). The popover also includes 'Cancel' and 'Disable' buttons.

Item Name	Status	Price
50-50 Kunafa	Live	₹479
Aam-E-Bahaar Kunafa	Live	₹449
Assorted Kunafa Cones [3Pcs]	Inactive	₹359
Assorted Mini Kunafa Combo [3 Pcs]	Live	₹419
Astha - E- Malai Kunafa Cone [2Pcs]	Offline	₹239
Astha- E- Malai Kunafa	Live	₹359
Astha-E-Malai Cone [1Pcs]	Offline	₹159
Biscoff Kunafa Milkshake	Live	₹200

WHAT THIS SCREEN IS

Clicking the stock pill opens a small popover. Turning an item OFF asks for a turn-on time (or 'until I switch it on'); the item is instantly marked out-of-stock on Swiggy and Zomato and shows an 'Offline · Back at' badge. Turning ON re-lists it at once.

NARRATION (VIDEO SCRIPT)

Ran out of a dish mid-shift? Tap the pill, pick when it will be back, confirm — Swiggy and Zomato update immediately.

CONTROLS & ACTIONS

- 1 Turn-on time options** — e.g. 30 min, 1 h, tomorrow, manual
- 2 Confirm** — pushes the stock change to the aggregators
- 3 Cancel** — closes without change
- 4 Enable (when offline)** — brings the item back live

Quick Edit on an aggregator item — Swiggy / Zomato / Brand

The screenshot displays the 'Menu Management' interface. On the left is a sidebar with navigation icons. The main area is titled 'Menu Management' with filters for 'Aggregator' and 'All'. A search bar for 'Search categories' is present. Below it, a list of menu items is shown, including 'Coffee Essential', 'Kunafa Bomb', 'Authentic Kunafa', 'Milkshake', 'Exotic Kunafas', 'Indo-Fusion Kunafa', 'Koshari', 'Salankatia', 'Kunafa Cones', 'Loua', and 'Kunafa Tubs'. A '+ Add Category' button is at the bottom of the list.

The 'Quick Edit' modal is open, showing fields for 'Swiggy', 'Zomato', and 'Brand'. The 'Swiggy' and 'Zomato' fields are set to 'Yes', and the 'Brand' field is set to 'Main'. The item name is '50-50 Kunafa' and the unit is 'Piece'. The category is 'Combos' and the price is '479'. The food type is 'Veg' and the complementary status is 'No'. The tax type is 'GST' and the tax percentage is '5'. The tax calculation is 'Exclusive'. The inventory status is 'No' and the packaged status is 'No'. The Swiggy Pack Chrg is 'No'. At the bottom of the modal are 'Cancel' and 'Save' buttons.

Below the modal, a summary card for 'Aam-E-Bahaar Kunafa' is visible, showing it is 'Live' and priced at '₹449'. It also indicates it is an 'Exotic Kunafas - Veg' item and is listed on both 'Swiggy' and 'Zomato'.

WHAT THIS SCREEN IS

Quick Edit in Aggregator mode adds a top row: Swiggy (Yes / No), Zomato (Yes / No) and Brand (Main or a sub-brand), plus the Swiggy Pack Chrg flag lower down. The rest of the fields match the normal Quick Edit.

NARRATION (VIDEO SCRIPT)

On the aggregator menu, Quick Edit also controls the platform switches: Swiggy, Zomato, brand and packing charge.

CONTROLS & ACTIONS

- 1 Swiggy** — list / unlist on Swiggy
- 2 Zomato** — list / unlist on Zomato
- 3 Brand** — which sub-brand catalogue the item belongs to
- 4 Swiggy Pack Chrg** — apply Swiggy packaging charge
- 5 Save / Cancel**

Full Edit on an aggregator item — Platform Sync and Swiggy image

WHAT THIS SCREEN IS

The aggregator Full Edit form has two extras. Under Item Image, a 'Swiggy Image' switch: 'Use same as Item Image' or 'Upload different image' (Swiggy has stricter photo rules). A 'Platform Sync' section holds the Swiggy, Zomato and Swiggy Packing Charge toggles and the Brand dropdown.

NARRATION (VIDEO SCRIPT)

Aggregator items can carry a dedicated Swiggy photo and their own platform switches — all in the Platform Sync section.

CONTROLS & ACTIONS

- 1 **Swiggy Image: Use same as Item Image** — one photo for everything
- 2 **Swiggy Image: Upload different image** — separate uploader for Swiggy
- 3 **Platform Sync: Swiggy / Zomato toggles** — list on each platform
- 4 **Platform Sync: Swiggy Packing Charge** — apply Swiggy's packing fee
- 5 **Platform Sync: Brand** — sub-brand assignment
- 6 **Save** — writes item + both images in one multipart call

Aggregator Stock — Addon Stock tab

Menu Management Aggregator All

Add-ons Aggregator Stock Bulk Edit X

Addon Stock Variation Stock

⚠️ **Catalog status** changes apply to ALL brands restaurant-wide. **UrbanPiper toggle** is per-brand only.

Brand: Main Brand

Add-on	Price	Catalog (all brands)	UrbanPiper (this brand)
> Biscoff Spread	₹35	● Available OOS	Enable Disable
> Blue berry Filling	₹40	● Available OOS	Enable Disable
> BUTTER	₹10	○ Out of Stock Enable	Enable Disable
> Dark Chocolate Syrup	₹25	● Available OOS	Enable Disable
> Mango Filling	₹40	● Available OOS	Enable Disable
> Milk Chocolate Syrup	₹25	● Available OOS	Enable Disable
> Nutella Spread	₹30	● Available OOS	Enable Disable
> Rabdi	₹40	● Available OOS	Enable Disable
> Triple Chocolate Syrup	₹30	● Available OOS	Enable Disable
> White Chocolate Syrup	₹25	● Available OOS	Enable Disable

WHAT THIS SCREEN IS

The Aggregator Stock button opens two tabs. Addon Stock lists every add-on used on the aggregator menu with Enable / Disable buttons per brand, and a catalog-level status that applies to all brands restaurant-wide (a warning explains this). Use it when an add-on ingredient runs out.

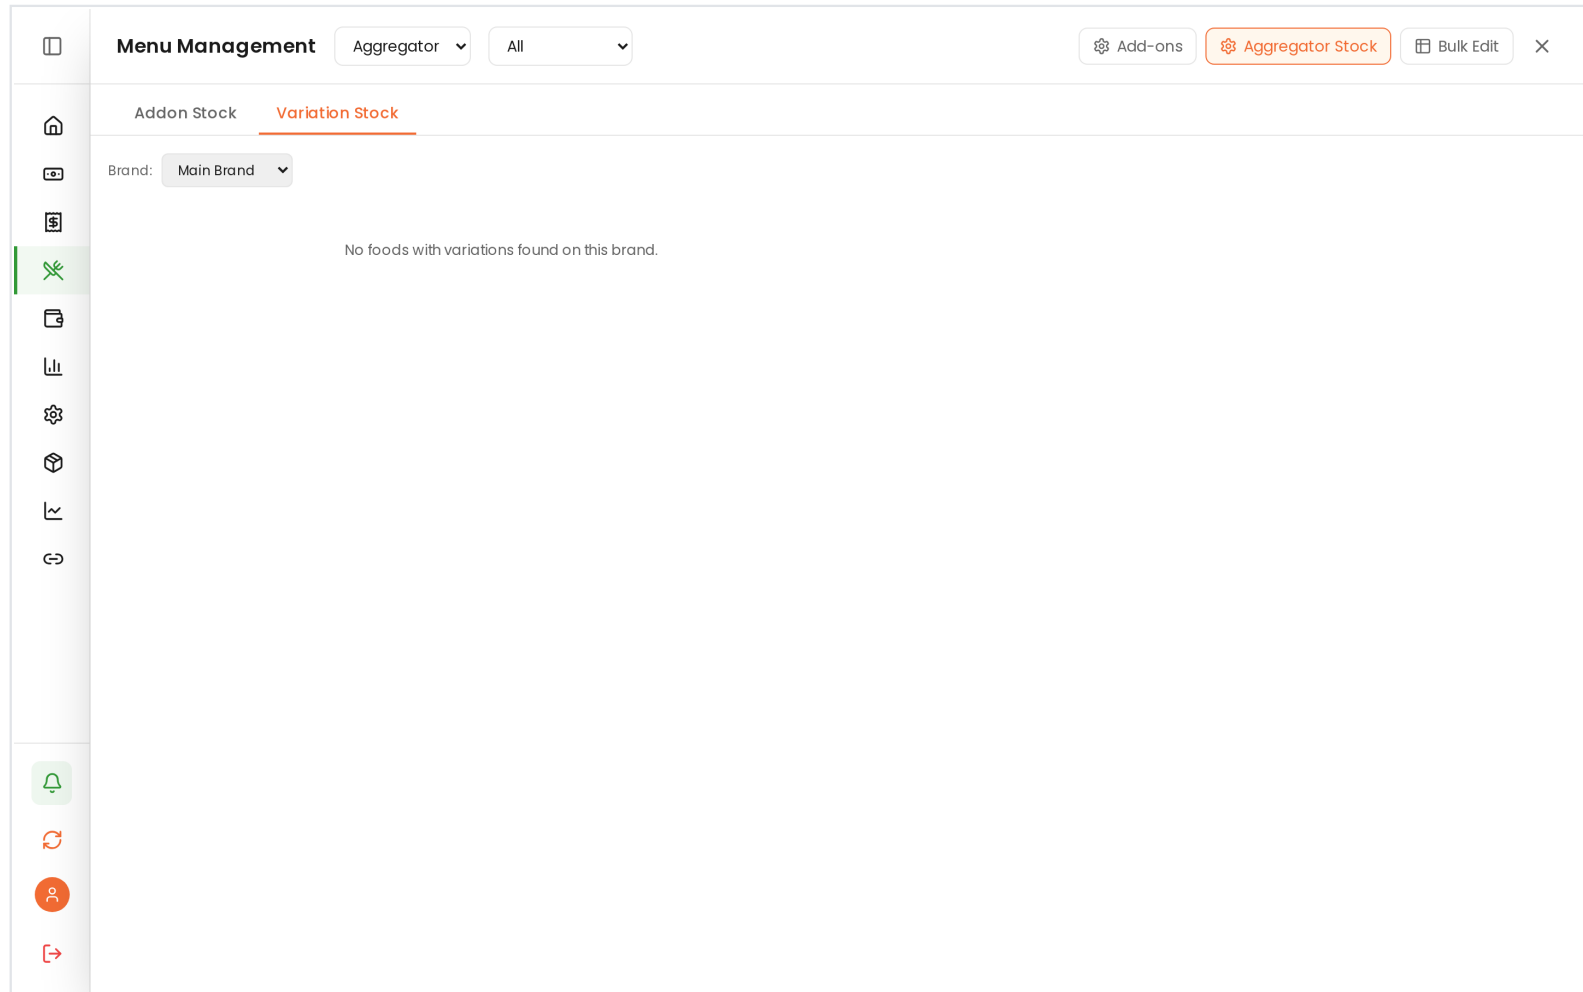

NARRATION (VIDEO SCRIPT)

Out of one add-on, not the dish? Aggregator Stock lets you disable just that add-on across Swiggy and Zomato.

CONTROLS & ACTIONS

- Addon Stock / Variation Stock tabs**
- Brand dropdown** — Main Brand or a sub-brand
- Enable / Disable per add-on** — stock ON / OFF on the aggregators
- Catalog status warning** — changes apply to ALL brands

Aggregator Stock — Variation Stock tab

**WHAT THIS SCREEN IS**

Variation Stock does the same for variation options (e.g. 'Large' size unavailable): each option can be enabled or disabled on the aggregators without touching the parent item.

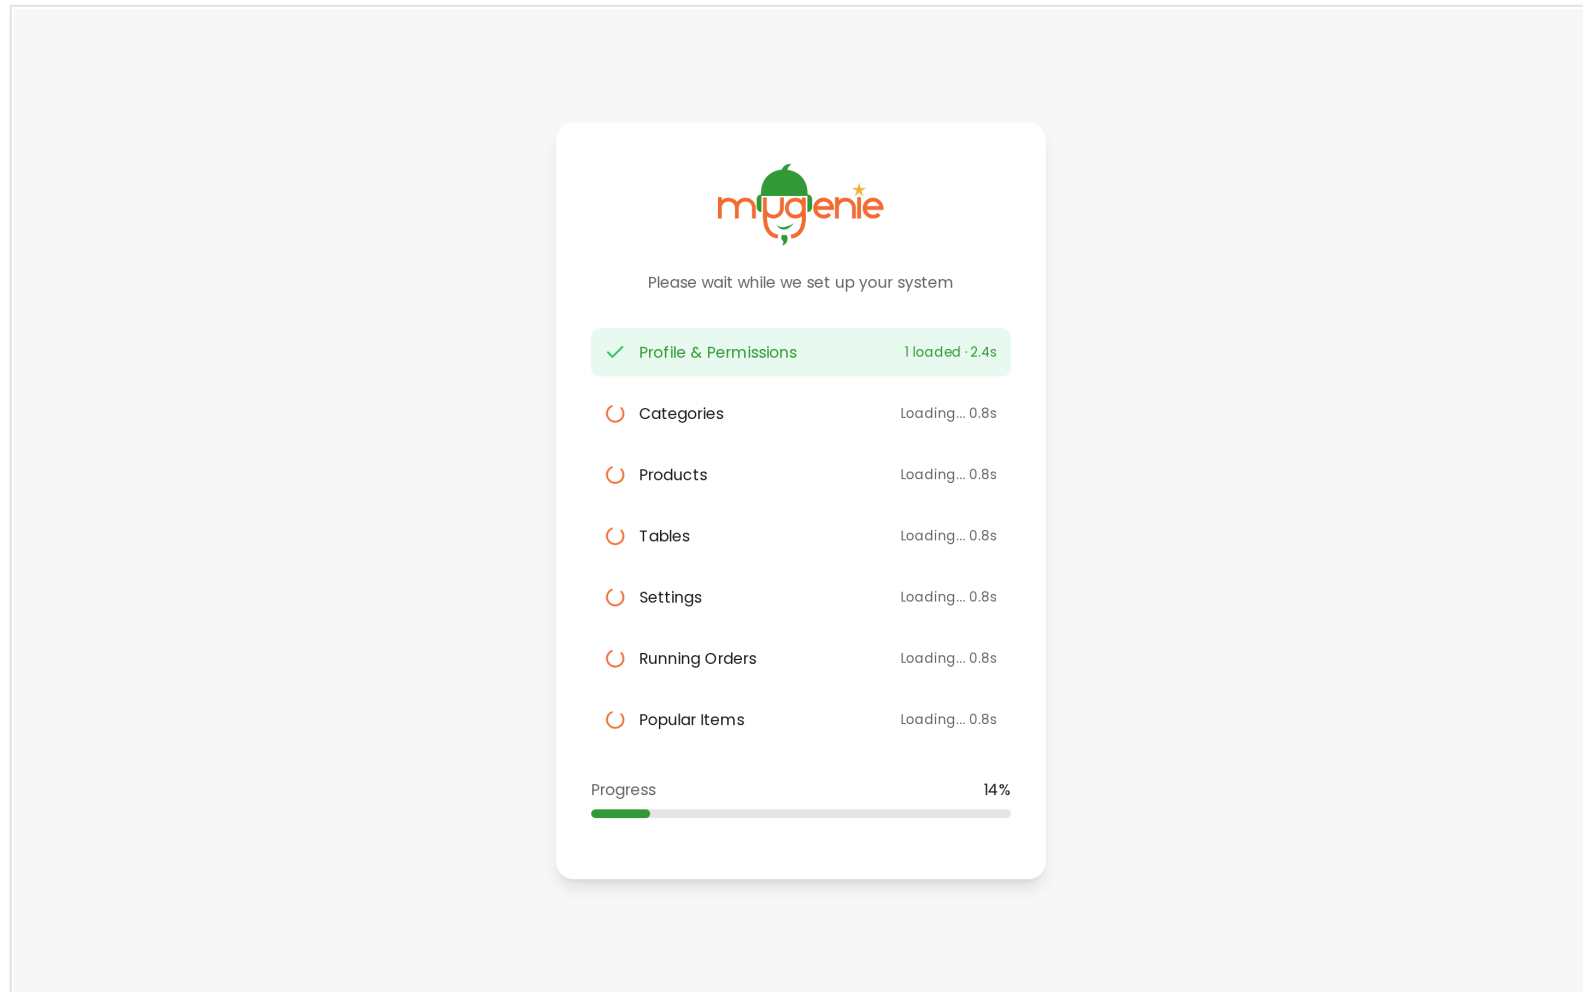

NARRATION (VIDEO SCRIPT)

Same idea for variations: switch off a single size or portion on the aggregators while the dish stays live.

CONTROLS & ACTIONS

- 1 Variation Stock tab** — switch from Addon Stock
- 2 Enable / Disable per option** — stock ON / OFF
- 3 Brand dropdown** — scope by sub-brand

Status Configuration — station-level settings

WHAT THIS SCREEN IS

Local Settings (Status Configuration) are stored per device / station, not per restaurant. This page controls how the order screen behaves on this terminal: order-taking mode, QSR mode, weight prompts, takeaway name / phone requirements, station view and — for menus — which menu this station actively sells from.

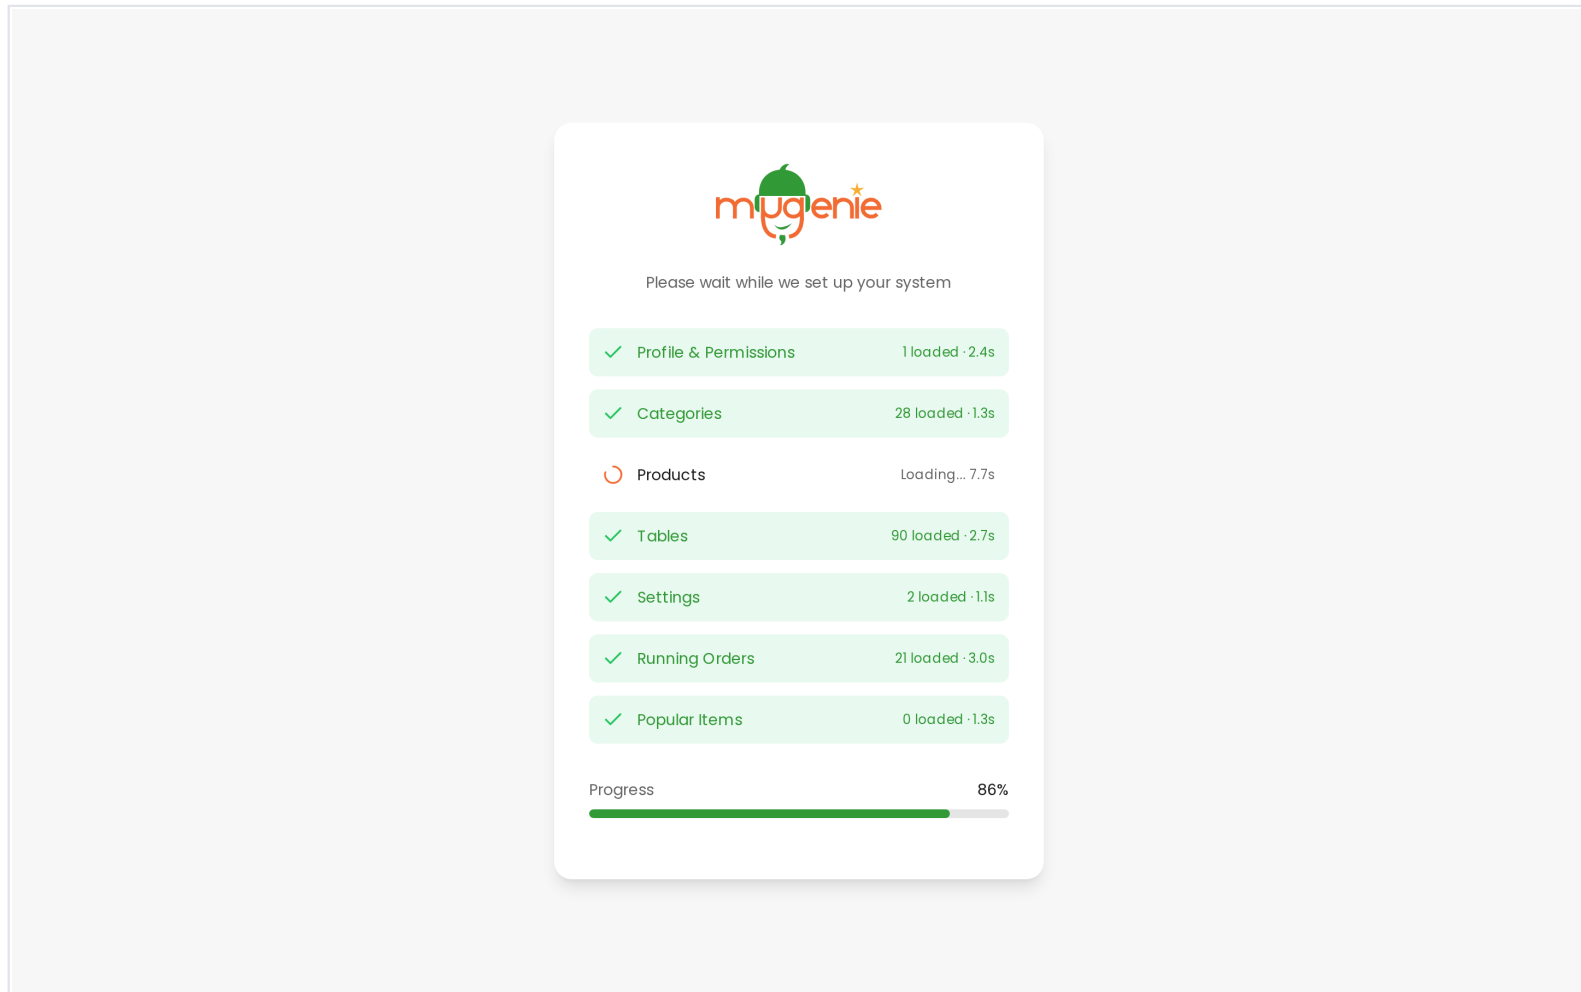

NARRATION (VIDEO SCRIPT)

Status Configuration is per terminal. It decides how this device takes orders — and which menu it sells.

CONTROLS & ACTIONS

- 1 Back** — return to previous page
- 2 Enable all / Disable all** — quick toggles for the visibility grid
- 3 Order-taking / QSR / Weight prompt toggles** — order screen behaviour
- 4 Save** — persists to this device; Reset — restores defaults

Active Menu — which menu this station sells

WHAT THIS SCREEN IS

The Active Menu block lists the restaurant's menus (Normal, Party, Premium...). The chosen one becomes the menu the order screen loads on this device: categories, items and prices all come from it. Default is Normal, so restaurants with one menu see no change. Save applies; the order screen picks it up on next open.

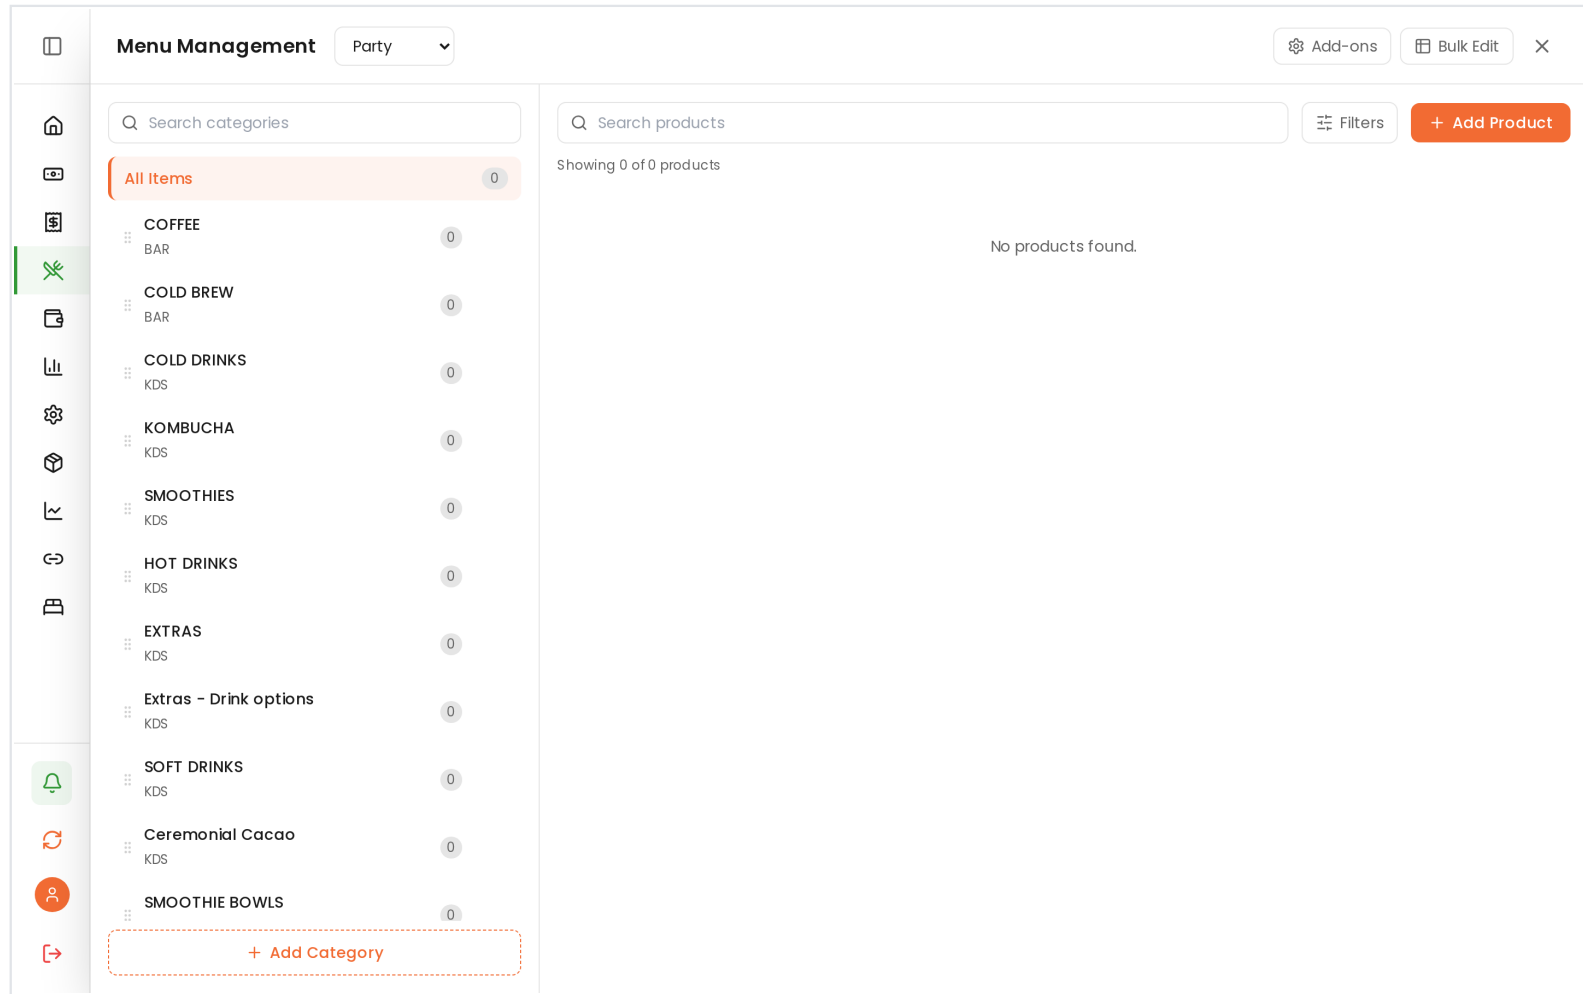

NARRATION (VIDEO SCRIPT)

Running a party in the banquet hall? Set that terminal's Active Menu to Party and it sells the party price list — other terminals are untouched.

CONTROLS & ACTIONS

- 1 Menu option buttons** — Normal / Party / Premium (one active)
- 2 Save** — stores the choice on this device
- 3 Reset** — back to Normal

Switching menus — Party menu selected

WHAT THIS SCREEN IS

Selecting 'Party' from the menu-type dropdown reloads all categories and items with Party-specific prices. Party and Premium menus are priced independently from Normal.

NARRATION (VIDEO SCRIPT)

Need a separate party price list? Switch to Party here. Everything you see now belongs to the Party menu only — your Normal menu is untouched.

CONTROLS & ACTIONS

- 1 Menu type dropdown** — select Party to view and edit Party-menu prices
- 2 Item counts** — recalculated for Party menu
- 3 Item cards** — show Party-menu prices and availability

Full Edit — Allow Discount toggled ON (discount fields revealed)

WHAT THIS SCREEN IS

Changing a variation group type from Single to Multi reveals two additional fields: Min (minimum picks required) and Max (maximum picks allowed). Use Multi for toppings, sides, or any choice where guests can pick more than one option.

NARRATION (VIDEO SCRIPT)

Switch a variation group to Multi and Min and Max appear. Set the bounds — for example, pick at least 1, up to 3 toppings — and the cashier or guest is guided through the choice.

CONTROLS & ACTIONS

- 1 Single / Multi selector** — switch to Multi to allow multiple picks
- 2 Min** — minimum number of options the guest must select
- 3 Max** — maximum number of options the guest can select

Quick Edit — complete form (all 12 fields)

WHAT THIS SCREEN IS

Clicking Validate Tax checks every item's tax configuration against the restaurant's registered tax slabs and highlights any items whose tax rate does not match a valid slab.

NARRATION (VIDEO SCRIPT)

Use Validate Tax after a bulk price revision or Excel import to catch any tax misconfiguration before it affects a guest bill. Correct highlighted items and validate again.

CONTROLS & ACTIONS

- 1 Validate Tax button** — triggers the slab check
- 2 Highlighted rows** — items with mismatched or unusual tax rates
- 3 Tax Type / Tax % columns** — the fields to correct

Reset All

Save 1 Change

WHAT THIS SCREEN IS

Any cell you edit in the Bulk Editor turns orange to signal an unsaved change. The footer shows how many dirty cells are pending. Reset All discards all changes; Save commits them all in one call.

NARRATION (VIDEO SCRIPT)

Orange means unsaved. Edit as many cells as you need — they all queue up. When you are ready, Save commits everything in one go. Not happy? Reset All undoes the entire session.

CONTROLS & ACTIONS

- Orange cell** — changed but not yet saved
- Dirty cell count (footer)** — number of pending changes
- Save (footer)** — commits all orange cells
- Reset All (footer)** — discards all changes and restores original values

336 items selected

Clear

Delete Selected (336)

WHAT THIS SCREEN IS

After filtering by a specific category, clicking the header checkbox selects every visible item at once. The footer then shows the count and activates the Delete Selected button — enabling bulk deletion of an entire category's items.

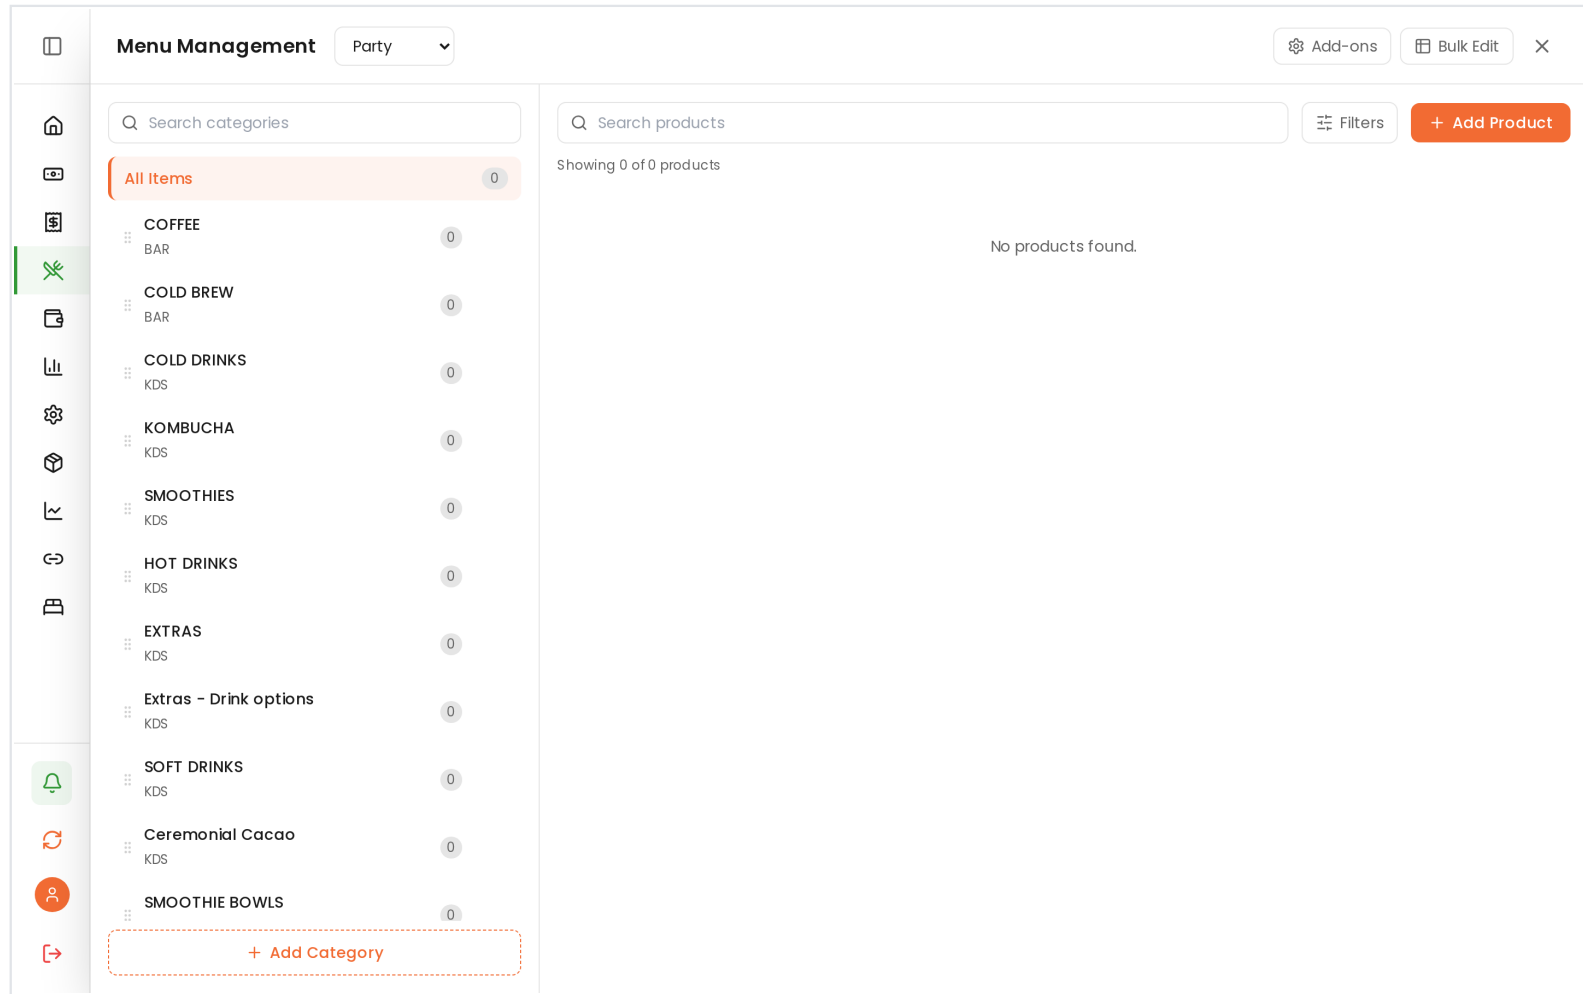

NARRATION (VIDEO SCRIPT)

Filter to a category, tick the header checkbox and every item in that category is selected instantly. Then Delete Selected to remove them all — the system will ask for a reason first.

CONTROLS & ACTIONS

- Category dropdown (filter strip)** — narrows the grid to one category
- Header checkbox** — selects / deselects all visible rows at once
- Delete Selected (footer)** — removes all selected items (requires reason)

Quick Edit while Party menu is active — Party price visible

WHAT THIS SCREEN IS

With the Party menu selected, Quick Edit on any item shows the Party-specific price. Changing and saving here updates the Party price without touching the Normal menu price.

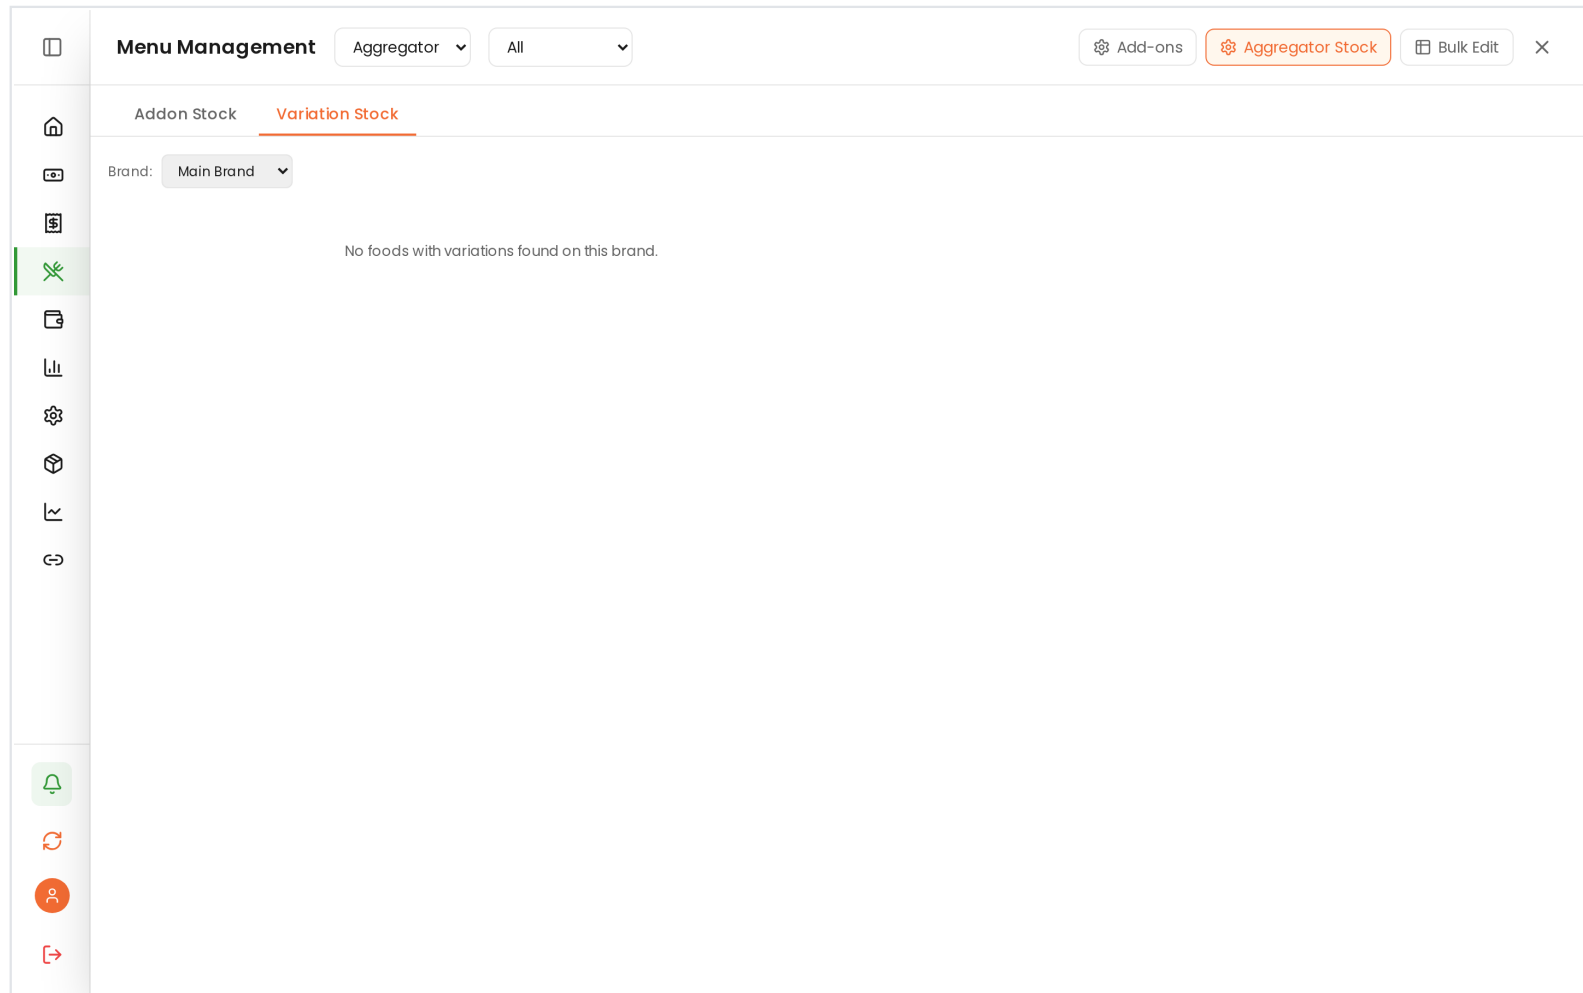

NARRATION (VIDEO SCRIPT)

While you are on the Party menu, Quick Edit shows the Party price. Edit it here and only the Party price changes — your Normal menu stays exactly as it is.

CONTROLS & ACTIONS

- 1 Price field** — shows and edits the Party-menu price
- 2 Menu type context** — changes here apply to Party menu only
- 3 Save** — saves Party price; Normal price is unchanged

Aggregator Stock — Variation Stock with data

**WHAT THIS SCREEN IS**

The Variation Stock tab lists every item that has variations, with each option (e.g. Small, Large) shown as a separate row. Each option can be enabled or disabled per aggregator platform independently.

NARRATION (VIDEO SCRIPT)

The Variation Stock tab lets you disable a specific size or option on one platform without affecting others. For example, disable Large on Zomato while keeping it live on Swiggy.

CONTROLS & ACTIONS

- 1 Variation Stock tab** — shows all variation options across all aggregator items
- 2 Item name + variation option** — each row is one selectable option
- 3 Enable / Disable per platform** — control availability at the variation level
