Menu Management — what it does

Menu Management is where the restaurant builds and maintains everything a guest can order: categories, items, prices, taxes, variations (sizes / spice levels), add-ons, images, channel availability (Dine-In, Delivery, Takeaway, Live Web) and the separate Aggregator menu that is pushed to Swiggy and Zomato. It offers three editing speeds — Quick Edit on the card, a Full Edit form, and a spreadsheet-style Bulk Editor with Excel import/export — plus drag-and-drop ordering that controls how the menu appears on the POS order screen.

WHO USES IT

Owner and Manager roles (permission 'food'). Typically used at menu launch, seasonal price revisions, daily out-of-stock marking, and when onboarding a new delivery aggregator.

KEY CAPABILITIES

- 1 **Multiple menus** — Normal, Party, Premium, Aggregator — switched from one dropdown; a station picks its Active Menu in Local Settings
- 2 **Categories** — create, rename, delete, assign a kitchen station / printer, drag to reorder
- 3 **Items** — card view with search and Active / Inactive / Veg / Non-Veg / Egg / Jain filters; drag to reorder inside a category
- 4 **Quick Edit** — the 12 most-changed fields inline on the card (price, tax, category, food type, flags)
- 5 **Full Edit / Add Item** — image upload, description, pricing & tax, discounts, classification, availability window, variations, add-ons, operations timings & on/off status flags
- 6 **Add-ons master** — one list of add-ons (price, weight, veg flag, inventory / recipe link) reused across items
- 7 **Bulk Editor** — spreadsheet grid, column picker by tier, dirty-cell tracking, Validate Tax, multi-select delete with reason, Excel download (all / template) and upload
- 8 **Aggregator menu** — Swiggy / Zomato sync flags, Swiggy-specific image, per-item stock ON / OFF with automatic turn-on time, Addon Stock and Variation Stock tabs

JOURNEY MAP (SCREEN NUMBERS)

Getting There

- 01 Opening Menu Management from the sidebar

Landing & Menus

- 02 Menu Management landing — Card View
- 03 Switching menus — Premium menu selected

Categories

- 04 Category column — search, counts and station
- 05 Category row hover — rename and delete
- 06 Rename a category / change its station
- 07 Delete a category — inline confirmation
- 08 Add Category form
- 09 Drag-and-drop category ordering

Items — Card View

- 10 Item cards — what each card tells you
- 11 Search and filter items
- 12 Rename, delete, status flags, four action buttons
- 13 Drag-and-drop item ordering
- 14 Inactive item — how it looks
- 15 Quick Edit inline on the card
- 16 Delete as item tab reason required

Full Edit / Add Item

- 17 Full Edit — name, unit, description and Item Image
- 18 Pricing & Tax and Classification sections
- 19 Availability & Channels — where and when it sells
- 20 Food Variations — sizes, portions, spice levels
- 21 Food Addons — attach existing or create new
- 22 Operations and Status & Flags sections
- 23 Add Item — blank form

Add-ons Master

- 24 Add-ons panel — the shared add-on list
- 25 Add-ons panel — creating a new add-on

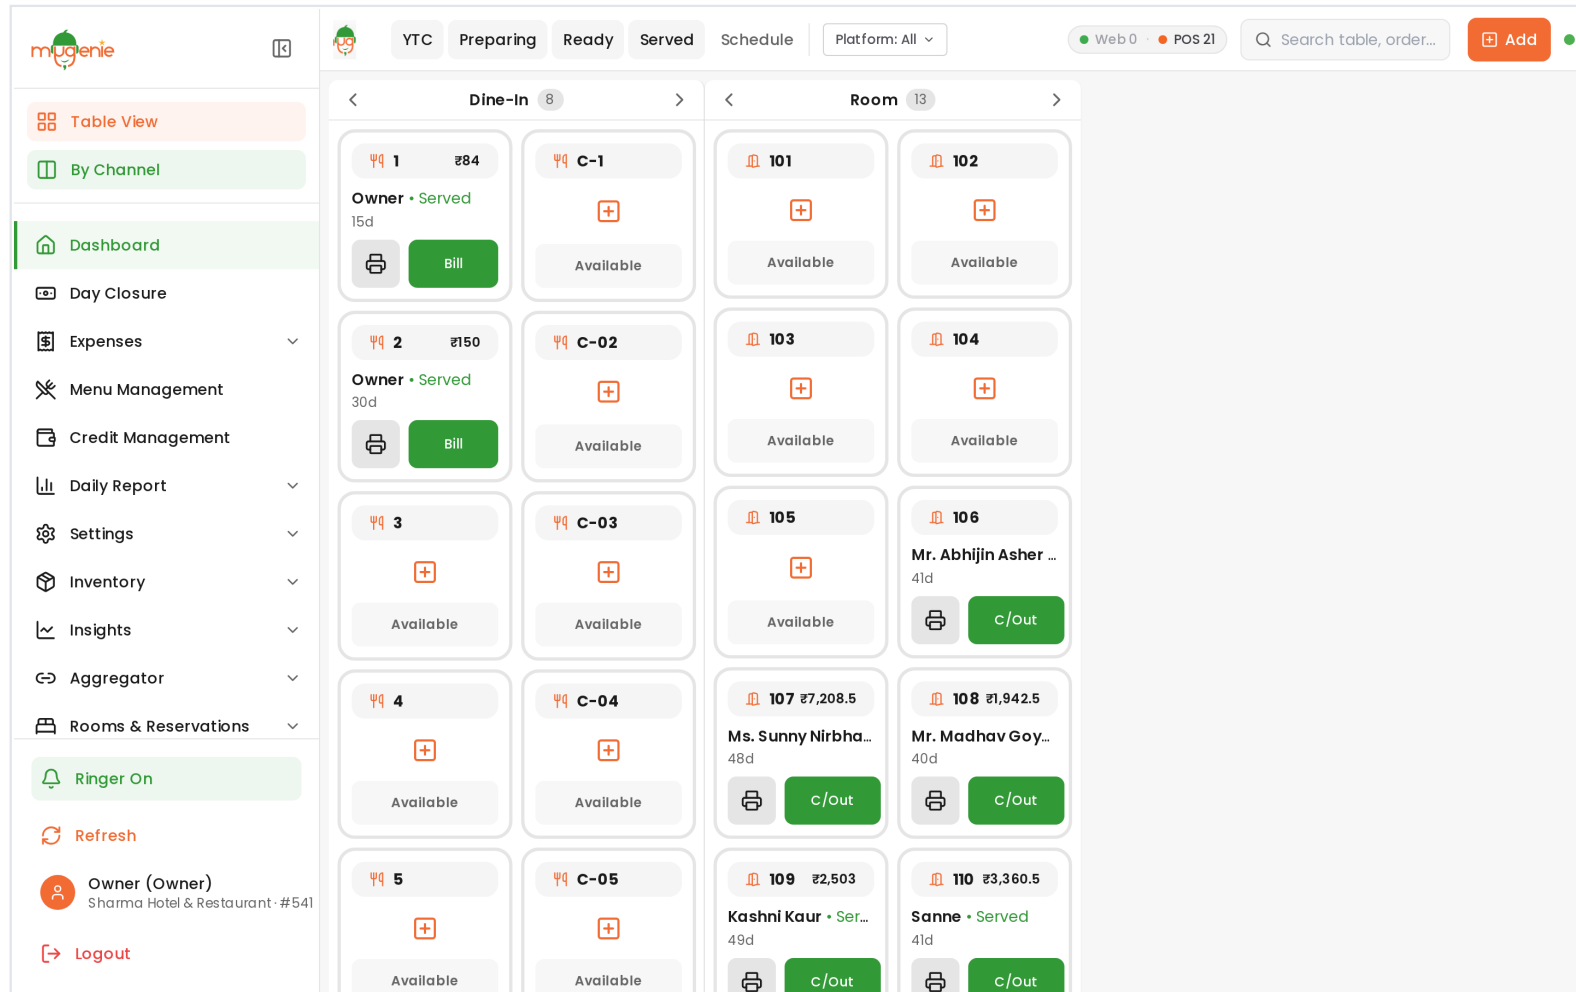

Bulk Editor

- 26 Bulk Editor — spreadsheet view of the whole menu
- 27 Column picker — choose which fields to edit
- 28 Download Excel — all items or blank template
- 29 Filter strip and inline cell editing
- 30 Add-ons and Variations expand inside a row
- 31 Multi-select rows — bulk delete banner
- 32 Bulk delete — reason dialog

Aggregator Menu (Swiggy / Zomato)

- 33 Aggregator menu — Card View
- 34 Item stock toggle — take offline until a time
- 35 Quick Edit on an aggregator item — Swiggy / Zomato / Brand
- 36 Full Edit on an aggregator item — Platform Sync and Swiggy image
- 37 Aggregator Stock — Addon Stock tab
- 38 Aggregator Stock — Variation Stock tab

Opening Menu Management from the sidebar

WHAT THIS SCREEN IS

Menu Management lives in the left navigation sidebar of the POS. With the sidebar expanded, the 'Menu Management' entry (fork-and-knife icon) is visible in the main list. Clicking it opens the module as a full page at /menu.

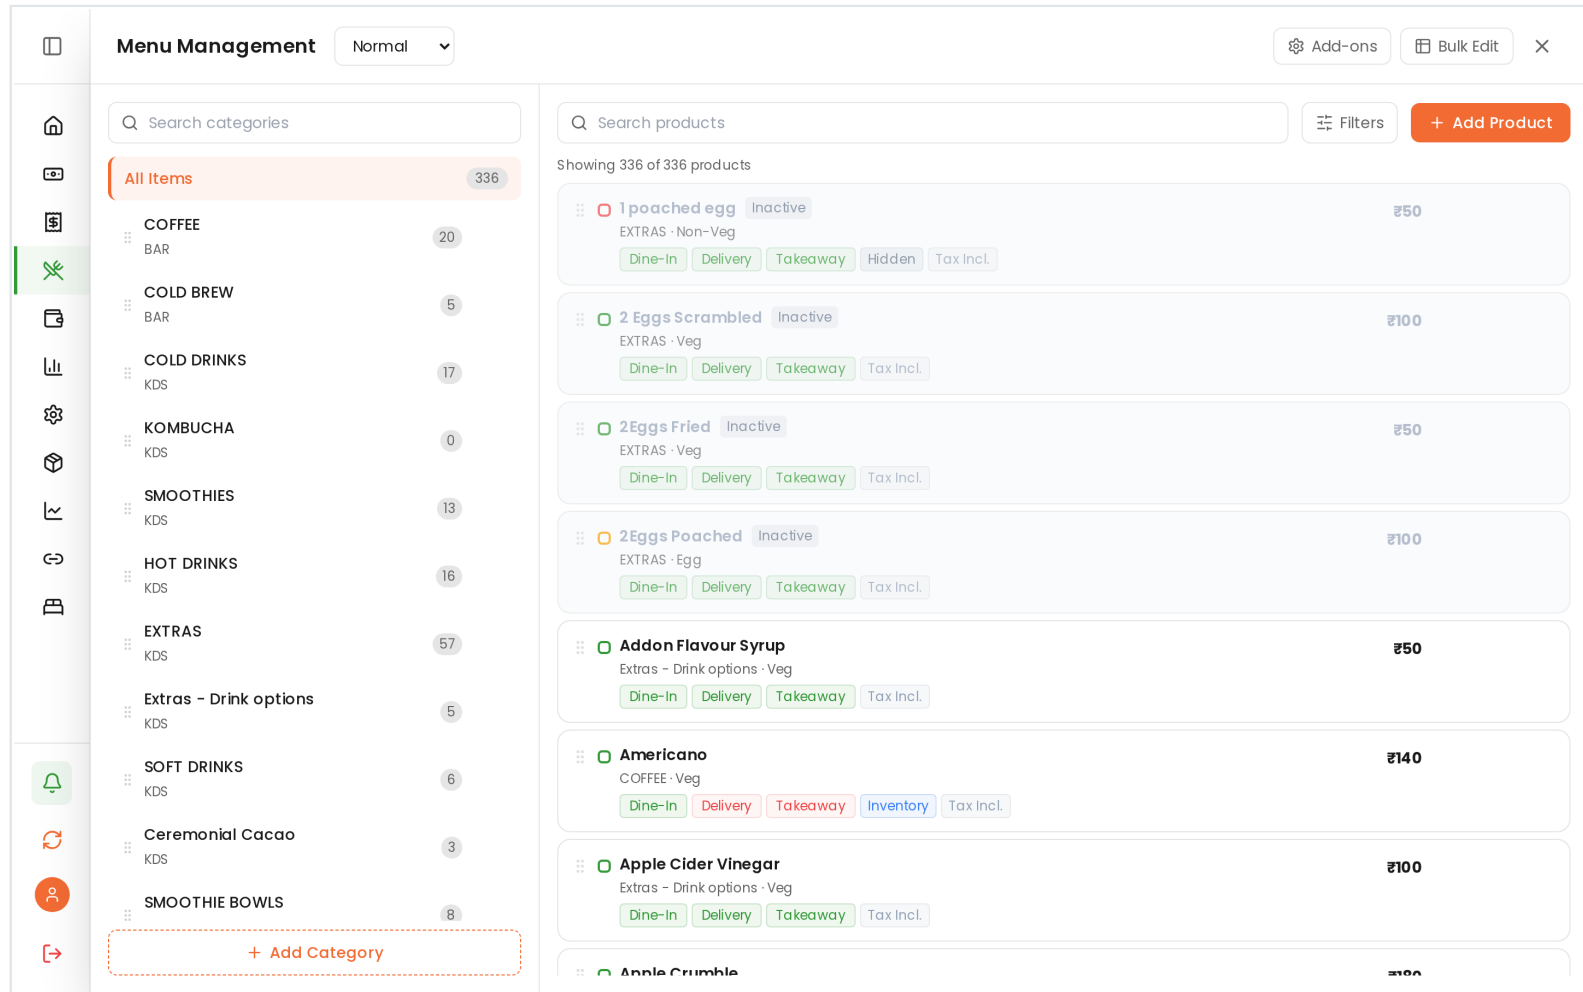

NARRATION (VIDEO SCRIPT)

From anywhere in MyGenie, open the sidebar and tap Menu Management. This is the home of every category, item, price and add-on your guests can order.

CONTROLS & ACTIONS

- 1 Sidebar expand / collapse arrow** — widens the sidebar to show labels next to icons
- 2 Menu Management entry** — opens the module; highlighted in orange when active
- 3 Restaurant profile block (bottom)** — shows the logged-in restaurant and role

Menu Management landing — Card View

WHAT THIS SCREEN IS

The default view. The left column (30%) lists categories with an item count badge; the right column (70%) shows item cards for the selected category ('All' by default). The header holds the menu-type dropdown and the three mode buttons: Add-ons, Bulk Edit and Close.

NARRATION (VIDEO SCRIPT)

This is the Card View. Categories on the left, items on the right. The dropdown at the top decides which menu you are editing.

CONTROLS & ACTIONS

- Menu type dropdown** — switches between Normal, Party, Premium and Aggregator menus; everything below reloads
- Add-ons button** — opens the add-ons master panel
- Bulk Edit button** — swaps the card view for the spreadsheet Bulk Editor (label becomes 'Card View' to switch back)
- Close (X)** — returns to the previous page
- Category column** — 'All' plus every category with its item count; click one to filter the cards
- Item column** — search box, Filters toggle and green '+ Add' button above the item cards
- Loading... indicator** — appears next to the title while items are being fetched

Switching menus — Premium menu selected

The screenshot shows the MyGenie Menu Management interface. The sidebar on the left contains navigation options: Table View, By Channel, Dashboard, Day Closure, Expenses, Menu Management, Credit Management, Daily Report, Settings, Inventory, Insights, Aggregator, and Rooms & Reservations. The main area displays a grid of menu items categorized under Dine-In (8) and Room (13). Each item card shows the item name, price, status (e.g., Served, Available), and a button to view the bill or c/out. The top bar includes tabs for YTC, Preparing, Ready, Served, and Schedule, along with a search bar and an Add button.

WHAT THIS SCREEN IS

Each restaurant can run several menus. Selecting 'Premium' reloads categories, counts and cards for that menu only. Party and Premium menus are priced independently from Normal; Aggregator is the Swiggy / Zomato catalogue.

NARRATION (VIDEO SCRIPT)

Need a separate party or premium price list? Switch menus here. Every card and count you see now belongs to the Premium menu only.

CONTROLS & ACTIONS

- Menu type dropdown** — lists every menu configured for the restaurant (Normal / Party / Premium / Aggregator)
- Item counts** — recalculated for the chosen menu
- Item cards** — show the Premium prices and availability chips

Category column — search, counts and station

The screenshot displays the 'Menu Management' interface. On the left, the 'Category column' is visible, listing various categories with their counts and station labels. The 'COFFEE' category is highlighted in orange. The main area shows a list of products under the 'COFFEE' category, including 'Americano', 'Bumble', 'COCONUT ICED COFFEE', 'Cappuccino', 'Cortado Coffee', 'Decaf Americano', 'Decaf Cappuccino', and 'Decaf Latté'. Each product row includes a search box, a list of filters (Dine-In, Delivery, Takeaway, Inventory, Tax Incl.), and a price tag.

Category	Station	Count
COFFEE	BAR	20
COLD BREW	BAR	5
COLD DRINKS	KDS	17
KOMBUCHA	KDS	0
SMOOTHIES	KDS	13
HOT DRINKS	KDS	16
EXTRAS	KDS	57
Extras - Drink options	KDS	5
SOFT DRINKS	KDS	6
Ceremonial Cacao	KDS	3
SMOOTHIE BOWLS		8

Product	Station	Price
Americano	BAR	₹140
Bumble	BAR	₹220
COCONUT ICED COFFEE	BAR	₹250
Cappuccino	BAR	₹160
Cortado Coffee	BAR	₹150
Decaf Americano	BAR	₹140
Decaf Cappuccino	BAR	₹160
Decaf Latté	BAR	₹160

WHAT THIS SCREEN IS

Categories are the top-level grouping guests see on the order screen. Each row shows the drag grip (⋮), the category name, the kitchen station / printer it routes to (small grey text) and a count badge of items in it. The list has its own search box and an '+ Add Category' button at the bottom.

NARRATION (VIDEO SCRIPT)

Categories drive both the guest-facing order screen and kitchen routing. The grey label under each name is the station its KOTs print to.

CONTROLS & ACTIONS

- 1 Search categories** — filters the list as you type
- 2 All** — clears the category filter and shows every item
- 3 Category row** — click to show only that category's items (row turns orange with a left bar)
- 4 Drag grip (left of each row)** — press-and-hold to reorder categories; the order is what the POS shows
- 5 Station label** — the printer / KDS station this category's KOTs go to
- 6 Count badge** — number of items in the category for the current menu
- 7 + Add Category** — opens the inline create form
